Figure S1. (**a**)–(**l**) Recorded POM images of PDLC obtained after UV curing with intensity of 6.61, mW/cm^2 for 12 h at V = 0–100 V.

Figure S2. (**a**)–(**l**) Recorded POM images of PDLC obtained after UV curing with intensity of 5.74 mW/cm^2 for 12 h at V = 0–100 V.

Figure S3. (**a**)–(**l**) Recorded POM images of PDLC obtained after UV curing with intensity of 4.33 mW/cm^2 for 12 h at V = 0–100 V.

Figure S4. (**a**)–(**l**) Recorded POM images of PDLC obtained after UV curing with intensity of 1.53 mW/cm^2 for 12 h at V = 0–100 V.

Figure S5. (**a**)–(**l**) Recorded POM images of PDLC obtained after UV curing with intensity of 0.92 mW/cm² for 12 h at V = 0–100 V.

Figure S6. (**a**)–(**l**) Recorded POM images of PDLC obtained after UV curing with intensity of 0.83 mW/cm² for 12 h at V = 0–100 V.
