Tetz V. Tetz G. Novel cell receptor system of eukaryotes formed by previously unknown nucleic acid-based receptors.

Supplementary Figure S3. Effect of primary TezRs destruction on cell number and multipolar morphotypes vs bipolar morphotypes in 24h old culture of Vero cells

Morphology of 24h old TezR_D1d, Vero TezR_R1d, and TezR_D1/R1d Vero cells following the treatment with nucleases as discussed in materials and methods was studied by light microscopy. Cells were left treated with vehicle for negative control. Similar cellular morphology was observed in five independent experiments.  Magnification: 10x.
