

Supplemental Figure 1. Comparison plots between LC-MS/MS and HPLC-ECD. (A) Passing-Bablok regression and (B) Bland-Altman plot to compare VMA concentrations measured by LC-MS/MS and HPLC-ECD.

Abbreviations: LC-MS/MS, liquid chromatography-tandem mass spectrometry; HPLC-ECD, high-performance liquid chromatography coupled with electrochemical detection.

Supplemental Table 1. Summary of LC-MS/MS methods for quantification of HVA and VMA.
