^a Coefficient of determination (R^2) of the calibration curve in the range 40-400 $\mu\text{g L}^{-1}$, n=6.

^b Relative recovery values (%) obtained in the analysis of Sample 3, expressed as the mean value of three replicates ± standard deviation.

^c Precision expressed as relative standard deviation (RSD,%), n=5.

* Analytes with no data did not meet the validation criteria of Document No. SANTE/12682/2019 [38].

Table S5. Analytical figures of merit of the proposed method in food simulant D1.
