Figure S1. Chromatograms obtained from ultra-performance liquid chromatography with mass spectrometry and electrospray ionization UHPLC-ESI-MS(-) (a) and UHPLC-ESI-MS(+) (b), and UHPLC with photodiode detector—PDA (254 nm) (c). These chromatograms represent fractions obtained through liquid–liquid extraction from the extract of *C. acaulis*. The abbreviations used are as follows: ECV—methanol extract, HCV—hexane fraction, EaCV—acetate fraction, BCV—butanol fraction, H<sub>2</sub>OCA—water fraction.
