

Supporting Information

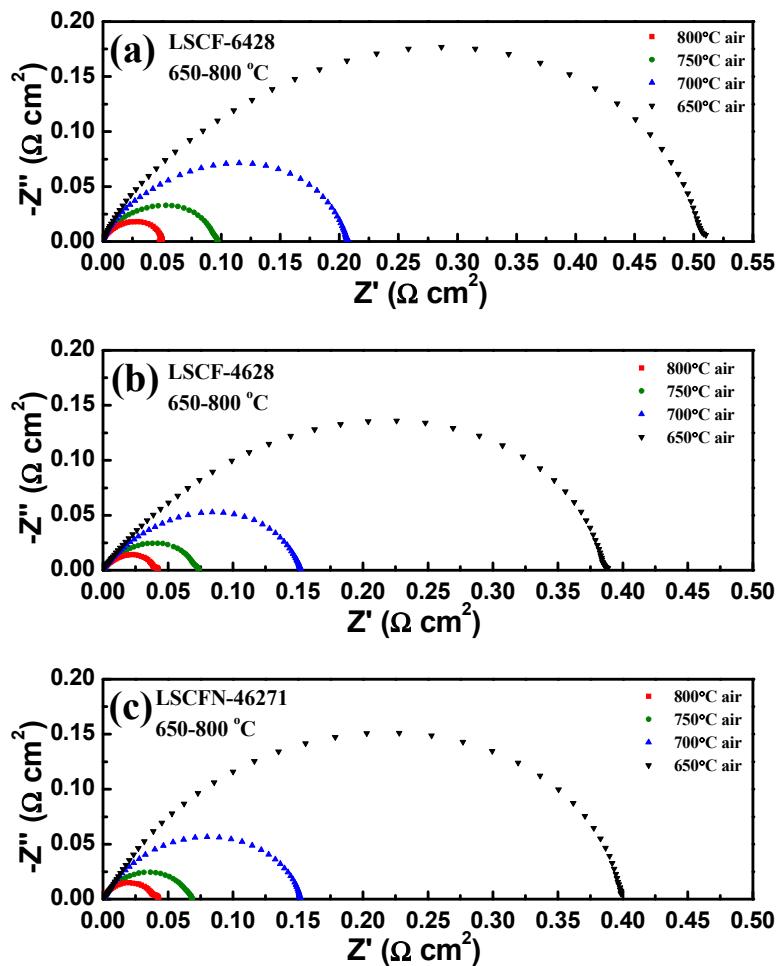

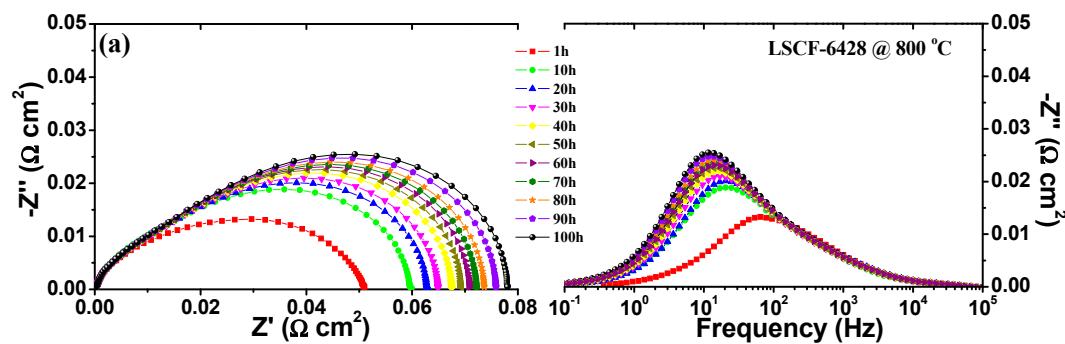

Figure S1. EIS of 3 symmetric electrodes between 650-800 °C in air.

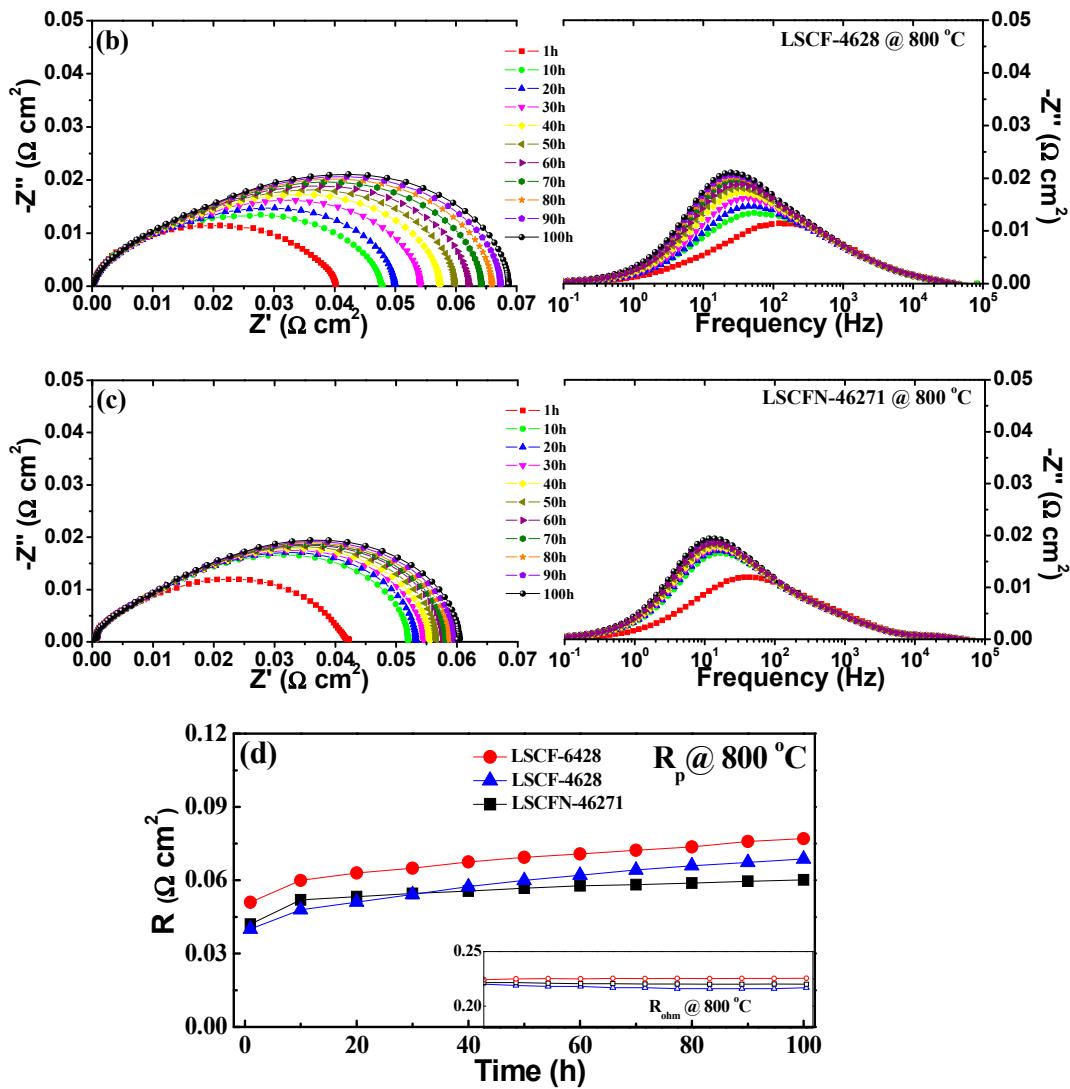

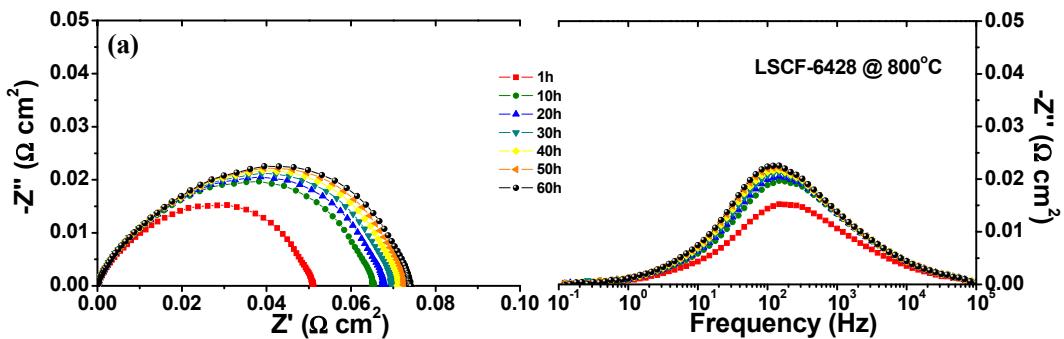

Figure S2. EIS stability test of 3 symmetrical electrodes in air at 800 °C.

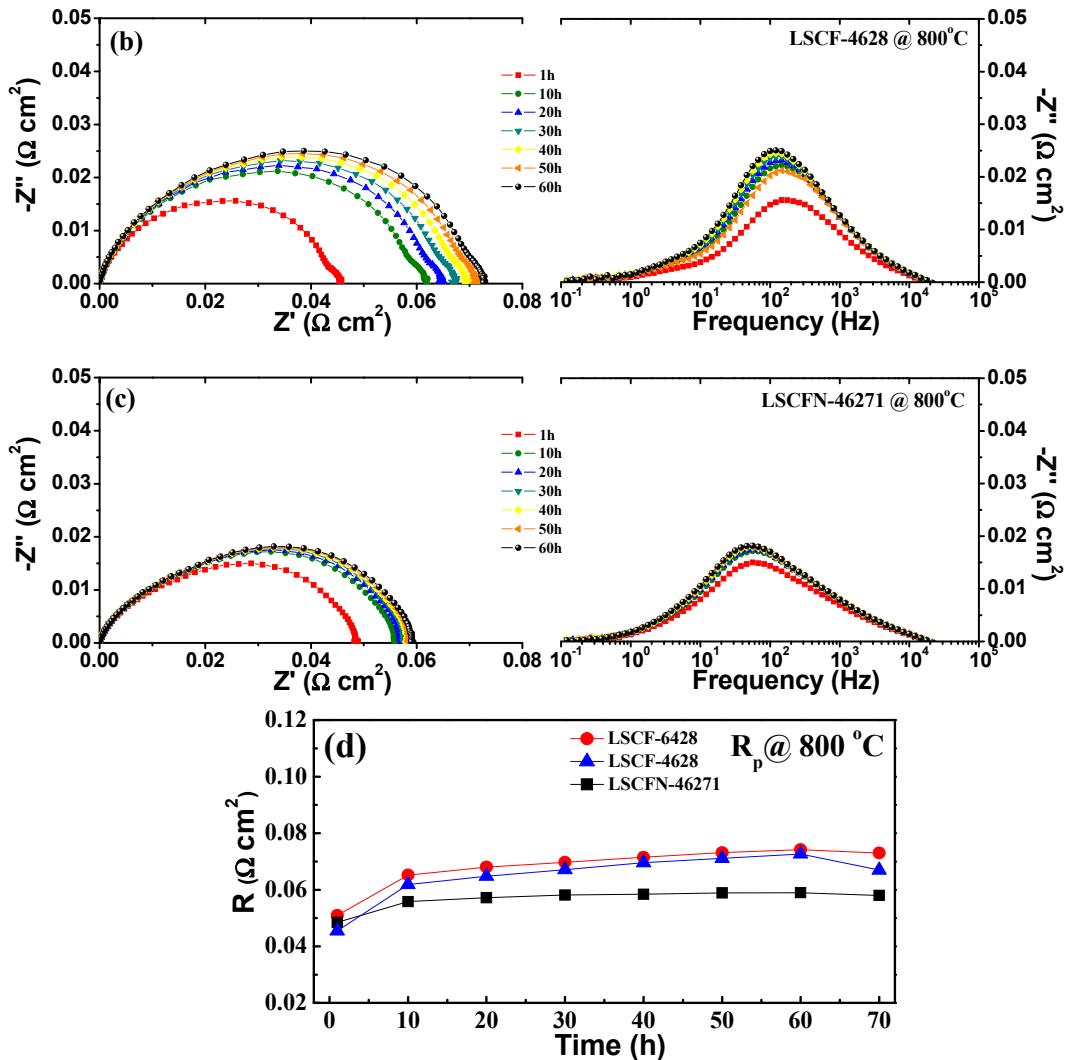

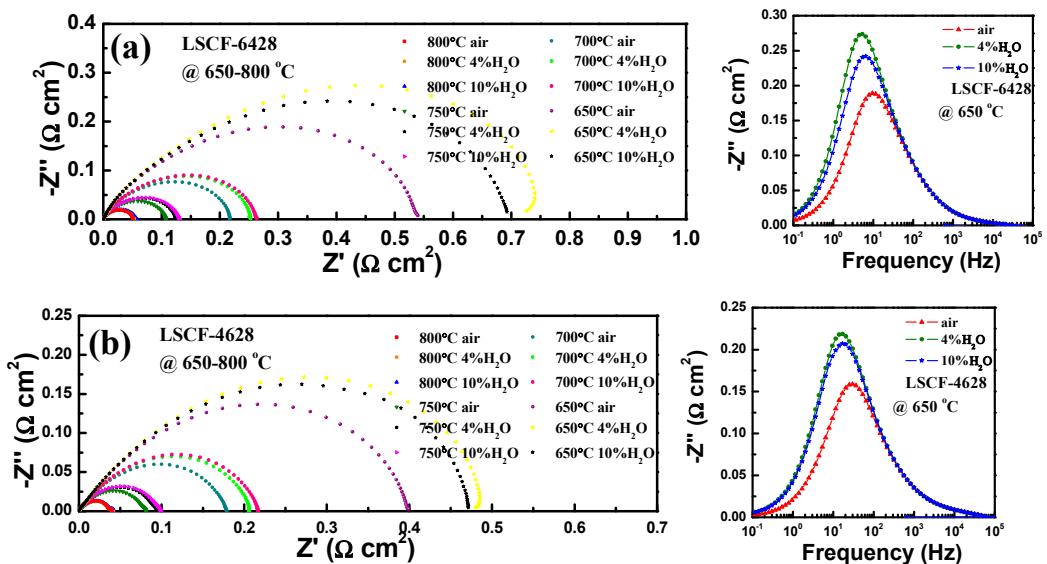

Figure S3. EIS test of the stability of 3 symmetrical electrodes in 20% CO₂-80% Air at 800 °C.

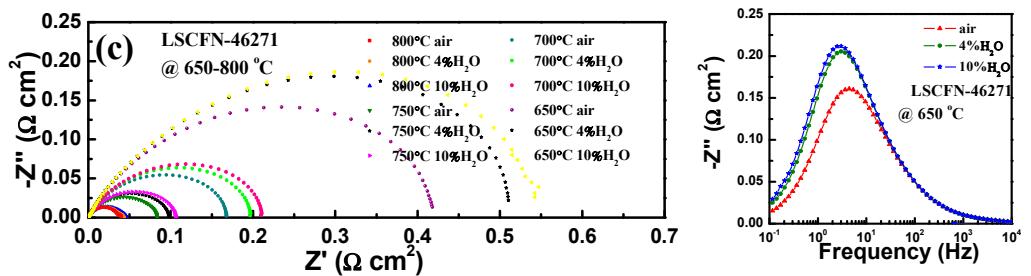

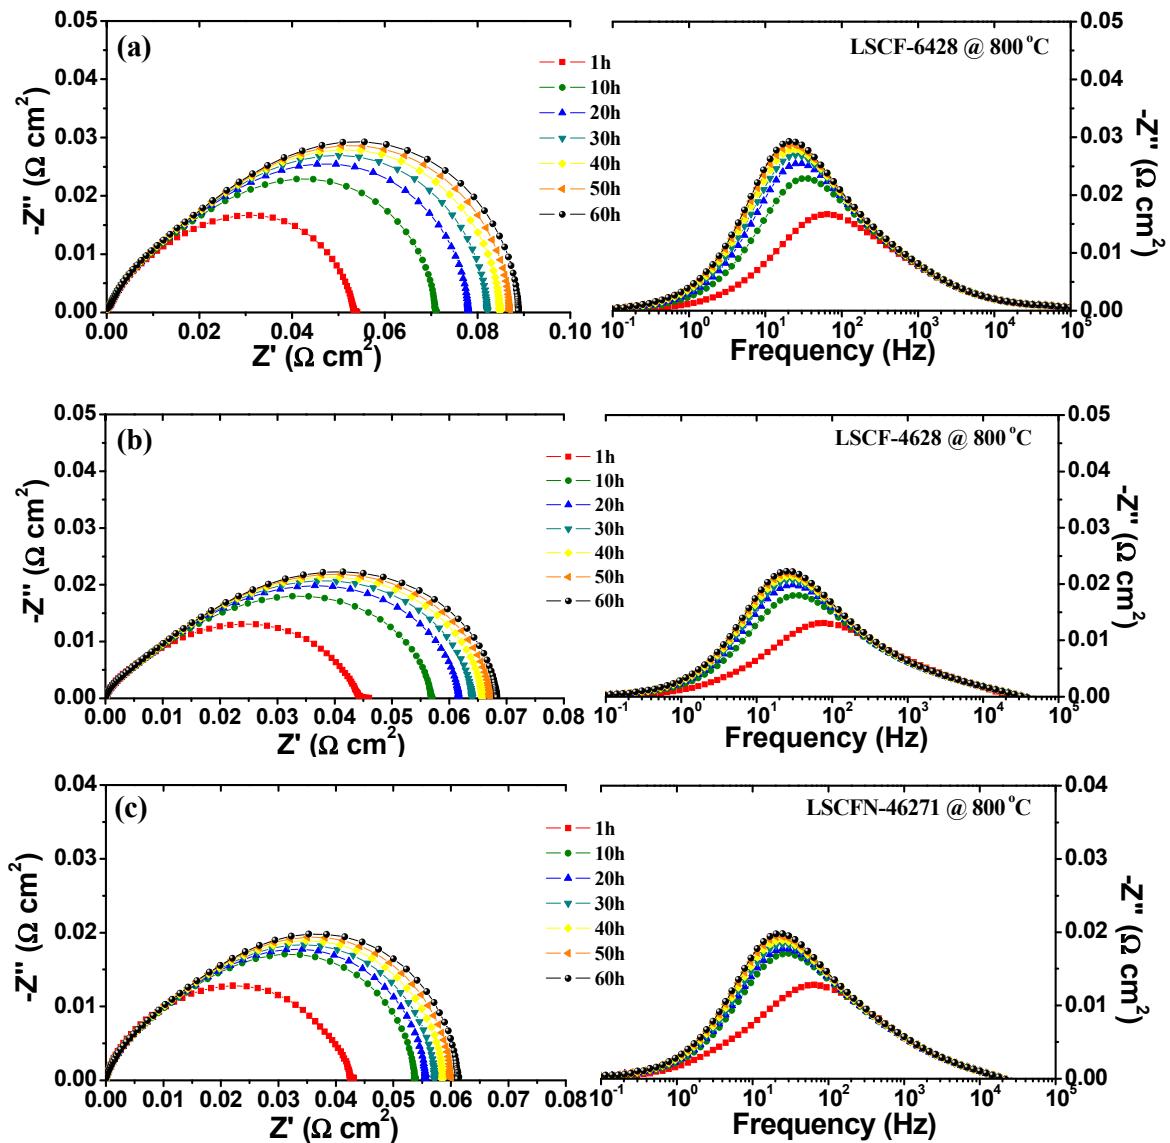

Figure S4. Nyquist plots and Bode plots of 3 electrodes under different H₂O concentration at 650-800 °C.

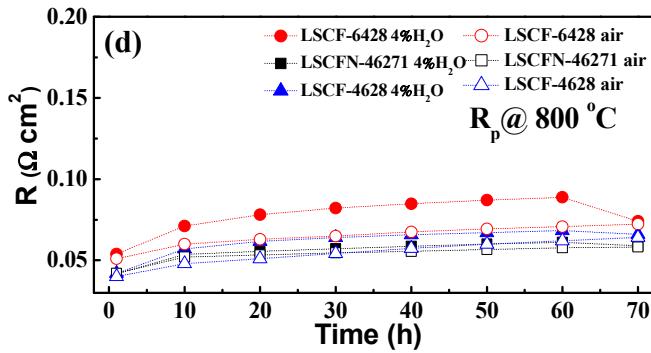

Figure S5. EIS stability test of 3 symmetrical electrodes in 4% H_2O -96% Air at 800 $^{\circ}\text{C}$.

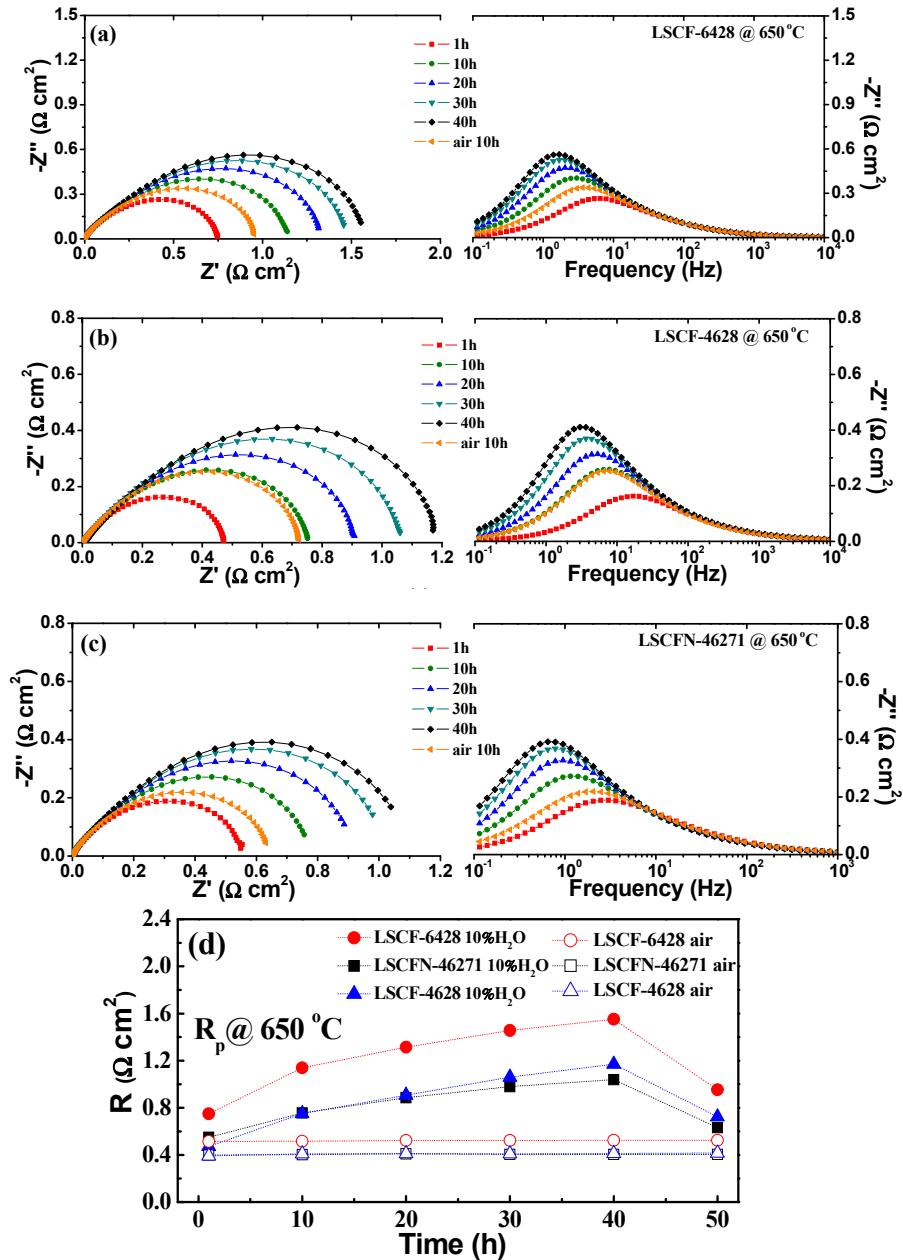

Figure S6. EIS stability test of 3 symmetrical electrodes in 10% H_2O -90% Air at 650 $^{\circ}\text{C}$.
