

Supplementary Information

Figure S1. Vps53 is not mis-distributed but less abundant in *Vps54^{wr/wr}* brains. Vps53 isoforms in size fractionated membrane compartments from wild type (WT) wobbler (WR) brain extracts. Every second fraction, fraction 2 to 20 was separated on SDS-PAGE, Western blotted and immunostained for Vps53 (rabbit anti Vps53, ABIN). The each band was quantified by densitometry and WT (green) and WR (purple) Vps53 isoforms were plotted separately.
