Supplementary Table 1. Table2, Figure1 and Figure 4 were experiments using leiomyoma tissue and the remainder were experiments using cultured leiomyoma cells. In Table 2 and Figure 1, all 13 samples were used. Samples #1,#2,#7, and #9 provided enough cells; however, in samples #3,#4,#11,#13, cells were not cultured well and did not provide adequate amounts of cells. Samples #1,#2,#7, and #9 are representative samples of this study and were used in all experimental steps. For the experiment, these four samples were used as a basis and additional samples were added as needed for each experiment.
