

Supplementary Figure 1 | Principal components analysis (PCA) of samples from three replicates across three group of plants.

Supplementary Figure 2 | Functional enrichment (biological process) analysis of differentially expressed proteins between TM-treated and control (CK) plants.

Supplementary Figure 3 | Functional enrichment (molecular function) analysis of differentially expressed proteins between TM-treated and control (CK) plants.

Supplementary Figure 4 | Functional enrichment (cellular component) analysis of differentially expressed proteins between TM-treated and control (CK) plants.
