

Table S3. Comparison of *bar* copy numbers estimated by TaqMan, dPCR and Southern blot assays for eight T₀ plants. For dPCR assay, the undigested DNA is analyzed and repeated once (r = 1).

Transgenic Lines	Ratio (target/ref)	Estimated Copy Number by dPCR	Estimated Copy Number by TaqMan Assay	Estimated Copy Number by Southern Blots
12151398	0.94	1	1	1
13181646	1.09	1	1	2
13201830	0.94	1	1	2
12060612	2.67	3	3	2
12080815	1.06	1	1	1
12040220	1.94	2	2	3
12060631	1.86	2	2	2
12040234	0.72	1	1	1

Notes: target, transgene *bar*; ref, endogenous gene *hmg*.
