

Supplementary Figure S1

A, Calcium imaging of HEK293 cells transfected with TRPV6-I-GFP (blue, $n/N=124/2$), TRPV6 R₅₁₀stop (green, $n/N=67/2$) and I-GFP vector (white, $n/N=86/2$), B statistical analysis. n = number of cells, N = number of experiments. **C, Subunits of the TRPV6 channel. The position of the G₆₆₀ residue is indicated (pink) as well as K₈₂ and W₈₅ of the interacting subunit (grey).**
