Figure S1. (a) Molds for the synthesis of the PASP and PASP/PEDOT hydrogels ; (b) Sample support device used in the electropolymerization of PHMeDOT and its electrochemical characterization.

Figure S2. Elution diagram of PSI by gel permeation chromatography (GPC)

Figure S3. Dynamic light scattering (DLS) spectrum of synthesized PEDOT MPs.

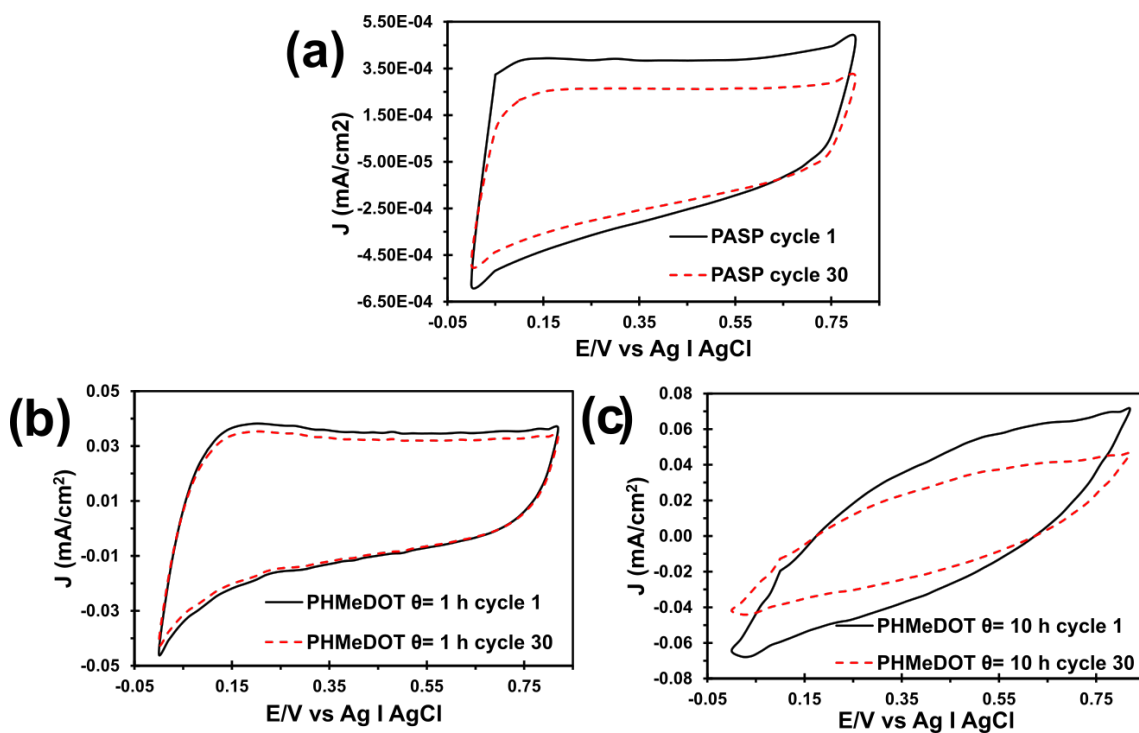

Figure S4. Voltammograms for (a) PASP Hydrogel; (b) [PASP/PEDOT] PHMeDOT ($\theta = 1$ h); and (c) [PASP/PEDOT] PHMeDOT ($\theta = 10$ h). Both the control voltammogram (first redox cycle) and the voltammogram after 30 consecutive redox cycles are shown.
