

Figure S1. Phylogenetic relationship, conserved protein motif and gene structure analysis of *PjAP2/ERFs*.

Figure S2. The distribution of *Citrus junos* AP2/ERF genes in 9 chromosomes. The scale bar on the left shows the length of the chromosome (Mb) and the chromosome number is displayed at the left of each chromosome.

Figure S3. Physiological analysis of *Citrus junos* cv. Pujiang Xiangcheng seedlings in response to waterlogging stress. Bars = 1 cm. DAT: Days After Treatment.
