

Figure S2. Relative expression levels of *Md4CL1*, *Md4CL3*, *Md4CL4*, *MdUFGT1*, *MdUFGT2*, *MdLAR1* and *MdLAR2* in 'Golden Delicious' at 0, 3, 7, 14 DAF. The relative expression levels are indicated on the y axis and are relative to the value at 0 DAF and normalized to actin and *EF1α*. Bars represent the standard deviation for three biological replicates.
