

Figure S2. Yeast two hybrid assay showing that there is no direct interaction between NbHAG1 and the CWMV proteins: P153, Rd4, MP, CRP, CP, NCP and CP-RT. The transformed yeast cells were grown on SD/-Leu/-Trp medium and then on SD/-Trp/-Leu/-His/-Ade medium. Yeast cells co-expressing AD-T+BD-Lam or AD-T+BD-53 were used as controls.
