

Figure S1. The allele frequency of the promising SNP in pigs with different meat color characteristics

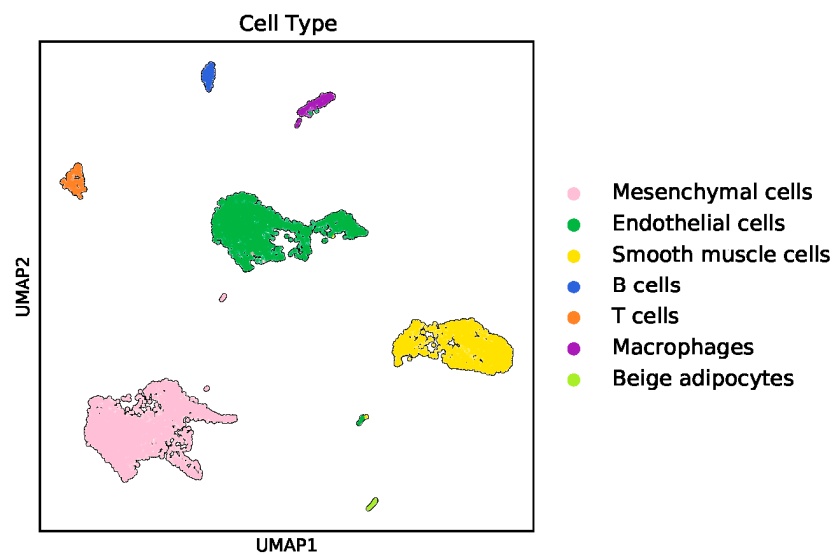

Figure S2. The uniform manifold approximation and projection (UMAP) of scRNA-seq data from adipose tissue

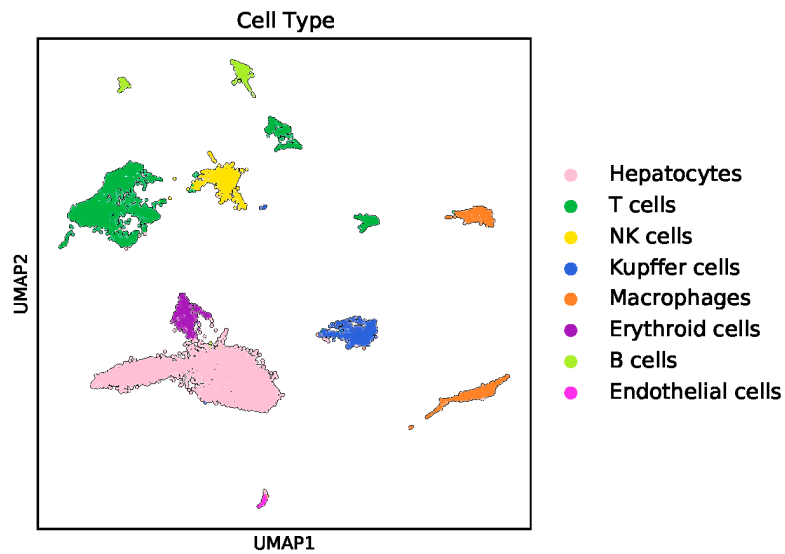

Figure S3. The uniform manifold approximation and projection (UMAP) of
scRNA-seq data from liver tissue

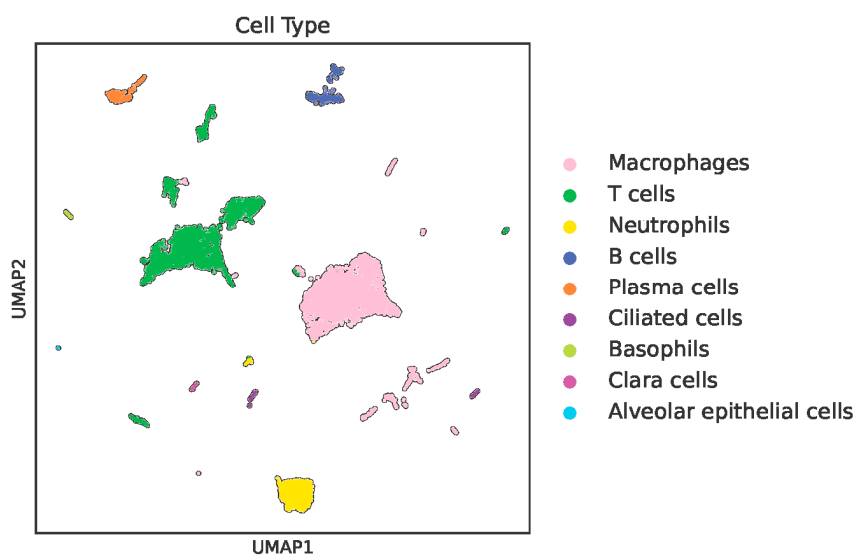

Figure S4. The uniform manifold approximation and projection (UMAP) of
scRNA-seq data from lung tissue

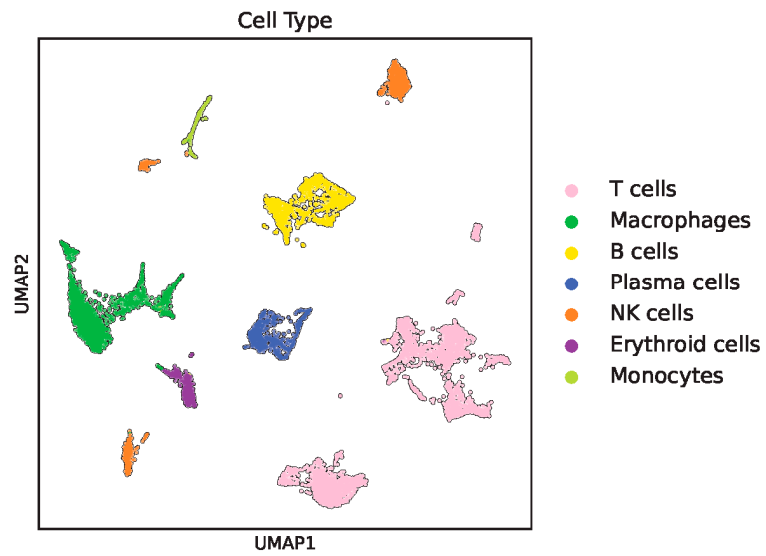

Figure S5. The uniform manifold approximation and projection (UMAP) of
scRNA-seq data from spleen tissue
