Supplementary data S2. Low molecular mass organic acids concentrations (mg/l) in limestone biodissolution by bacterial strains. “-“ means below detection limits.

Supplementary data S3. Scanning electron micrographs of initial (non-contacted) limestone grains (A) and after 7 days in the bioleaching medium with *Rhodococcus* sp. (B), *Stenotrophomonas* sp. (C) *Pedobacter* sp. (D), *Penicillium glandicola* (E) and *Aureobasidium* sp. (F)
