

Supplementary Table S1. Analysis of cell viability and biomechanical properties of each type of sample. Values are shown as means \pm standard deviations of each analysis group. F-0: fibrin hydrogels devoid of agarose; FA: all hydrogels containing fibrin and agarose, regardless the type and concentration of agarose. F-D1LE: fibrin-agarose biomaterials containing D1LE agarose; F-D2LE: fibrin-agarose biomaterials containing D21LE agarose; F-LM: fibrin-agarose biomaterials containing LM agarose; F-MS8: fibrin-agarose biomaterials containing MS8 agarose; F-D5: fibrin-agarose biomaterials containing D5 agarose.

Sample Type	Agarose Concentration	Cell Viability (%)	Young Modulus (MPa)	Stress At Fracture (MPa)	Strain At Fracture (%)	Break Load (N)

Supplementary Table S2. Statistical p values for the comparison of the cell viability and biomechanical properties among different groups of samples (global and specific groups). For the comparisons of global groups, analyses were carried out among types of biomaterials (regardless the concentration of agarose) and among concentrations (regardless the type of agarose). Statistically significant results are highlighted with asterisks (*). F-0: fibrin hydrogels devoid of agarose; FA: all hydrogels containing fibrin and agarose, regardless the type and concentration of agarose. F-D1LE: fibrin-agarose biomaterials containing D1LE agarose; F-D2LE: fibrin-agarose biomaterials containing D21LE agarose; F-LM: fibrin-agarose biomaterials containing LM agarose; F-MS8: fibrin-agarose biomaterials containing MS8 agarose; F-D5: fibrin-agarose biomaterials containing D5 agarose

Supplementary Table S3. Statistical p values for the comparison of the histochemical and immunohistochemical staining among different samples versus control group and fibrin hydrogels. Statistically significant results are highlighted with asterisks (*). F-0: fibrin hydrogels devoid of agarose; FA: all hydrogels containing fibrin and agarose, regardless the type and concentration of agarose. F-D1LE: fibrin-agarose biomaterials containing D1LE agarose; F-D2LE: fibrin-agarose biomaterials containing D21LE agarose; F-LM: fibrin-agarose biomaterials containing LM agarose; F-MS8: fibrin-agarose biomaterials containing MS8 agarose; F-D5: fibrin-agarose biomaterials containing D5 agarose
