

RACE SCALE	
<b>1. Facial palsy:</b>	
Facial movement is normal, symmetric	0
Facial gesture when showing the teeth or smiling is slightly asymmetrical	1
Facial gesture when showing the teeth or smiling is completely asymmetrical	2
<b>2. Arm motor function:</b>	
Maintain the arm against gravity >10 seconds	0
Maintain the arm against gravity <10 seconds	1
Cannot maintain the arm against gravity and drops immediately	2
<b>3. Leg motor function:</b>	
Maintain the leg against gravity >5 seconds	0
Maintain the leg against gravity <5seconds	1
Cannot maintain the leg against gravity and drops immediately	2
<b>4. Head and gaze deviation</b>	
Absent	0
Present	1
<b>5A. Agnosia / Negligence (if left hemiparesis)</b>	
<i>Asomatognosia (do not recognize the left part of his/her body)</i>	
<i>Anosognosia (do not recognize his/her weakness)</i>	
There is no asomatognosia nor anosognosia	0
There is asomatognosia or anosognosia	1
There is asomatognosia and anosognosia	2
<b>5B. Aphasia / Language (if right hemiparesis)</b>	
<i>Ask the patient: "Close your eyes" and "Make a fist"</i>	
Perform both tasks correctly	0
Perform one task correctly	1
Perform neither tasks	2
<b>TOTAL</b>
