Interactive map of the sampling locations: https://www.google.com/maps/d/edit?mid=1jar58UraZyclgQno7qF7_fFbSYGQ7hs&usp=sharing,

Table S1: Sampling Sites' details

Reference	ZIP	City	Location type	Latitude	Longitude	Dwelling type	Building year	Floors	Ventilation type	Heating type	N. of inhabitants	Notes
1	67348	Obernai	Rural	48.464100	7.485700	House	1930	2	Natural	Oil	2	Two floors but the first one is the only used - elderly couple, non-smoker
2	67000	Strasbourg	Urban	48.572200	7.714400	Appartement	1930	1	Natural	Gas	3	Lots of traffic on the road, bus stop under the windows - Couple and a child, non-smokers
3	67350	Oberschaeffolsheim	Urban	48.587600	7.654200	House	1980	2	Mechanical	Gas	3	House on the edge of the fields, but in the city: more peri-urban than urban, but being the only dwelling in this case, choice to define as urban for the statistics - Couple and a child, non-smoker
4	67482	Strasbourg	Urban	48.590700	7.768100	Appartement	1970	1	Natural	Gas	1	Tenant, near parking - Single person, non-smoker
5	67000	Strasbourg	Urban	48.629000	7.732000	House	1980	NA	NA	NA	NA	NA
6	67172	Griesheim-prés-Molsheim	Rural	48.503600	7.524000	House	1980	3	Mechanical	Oil + wood	4	Bathroom air extraction, no more oil heating, old boiler room transformed into a bedroom, in the air corridor of Entzheim airport - Couple and two children, non-smokers
7	67000	Strasbourg	Urban	48.573000	7.792000	Appartement	1974	NA	NA	NA	NA	NA
8	67000	Strasbourg	Urban	48.331000	7.451100	House	1930	4	Natural	Gas	5	Residential area without too much traffic, significant treatment of the wood frame in the past (lindane?) - Couple and three children (including a teenager), non-smokers
9	67292	Mietesheim	Rural	48.878500	7.639300	Appartement	1920	4	Natural	Wood	6	Couple and four children (including two babies), smoking father

NA: Not Assigned,

Supplementary Material S2:**Standards of individual pesticides used:**

2,4-D, 2,4-MCPA, acetochlor, alachlor, aldrin, allethrin, bifenthrin, buprofezin, chlorothalonil, clopyralid, cyphenothrin, cyprodinil, deltamethrin, dicamba, dichlobenil, dichlorprop, dieldrin, diflufenican, esbiothrin, flazasulfuron, fluoroxypry, imiprothrin, mecoprop-p, metazachlor, metolachlor, myclobutanil, o,p'-DDD, o,p'-DDE, o,p'-DDT, oxadiazon, p,p'-DDD, p,p'-DDE, p,p'-DDT, pentachlorophenol, permethrin, picloram, piperonyl butoxide, prallethrin, propachlor, propiconazole, tebuconazole, tetramethrin, triclopyr, trifluralin, α -cypermethrin, α -endosulfan, α -HCH, β -Endosulfan, γ -HCH, τ -fluvalinate

Supplementary Material S3: Retention time (RT), precursor ion and product ions with associated dissociation energy value in GC-MSMS for each pesticide.

Supplementary Material S5: Seasonal Variation of pesticides in air and dust samples, Asterisks (*) denotes denote means that are significantly different ($P <0.05$) between pyrethroids and non-pyrethroid pesticides in each matrix.

Supplementary Material S6: Classification of detected pesticides

Pesticide	Type
Propachlore	acetamide
Clopyralid	pyridine
γ -HCH	organochlorine
Chlorothalonil	dinitrile
Esbiothrine	pyrethroid
Cyprodinil	aminopyrimidine
Allethrin	pyrethroid
Prallethrin	pyrethroid
Buprofezine	thiadiazine
Imiprothrin	pyrethroid
Tebuconazole	triazole
Bifenthrin	pyrethroid
Cyphenothrin	pyrethroid
Permethrin	pyrethroid
α -cypermethrin	pyrethroid

* pesticides not belonging to pyrethroid are considered as "non-pyrethroids" pesticides.
