## Description of the Error and Correction

In Table 1 in the initially published manuscript, several column headings are incorrectly presented.

- “IMpower150 (nonsquamous): atezolizumab plus bevacizumab plus platinum or paclitaxel” should read “IMpower150 (nonsquamous): atezolizumab plus bevacizumab plus platinum plus paclitaxel.”
- “KEYNOTE-189 (nonsquamous): pembrolizumab plus platinum or paclitaxel” should read “KEYNOTE-189 (nonsquamous): pembrolizumab plus platinum plus pemtredexed.”
- “IMpower130 (squamous): atezolizumab plus platinum or nab-paclitaxel” should read “IMpower130 (nonsquamous): atezolizumab plus platinum plus nab-paclitaxel.”
- “KEYNOTE-407 (squamous): pembrolizumab plus platinum or paclitaxel or nab-paclitaxel” should read “KEYNOTE-407 (squamous): pembrolizumab plus platinum plus paclitaxel or nab-paclitaxel.”

In Figure 2 in the initially published manuscript, in the BRAF box under “SECOND-LINE,” “Dabrafenib, trametinib” should be colour-coded orange, because that treatment regimen is Health Canada-approved.
