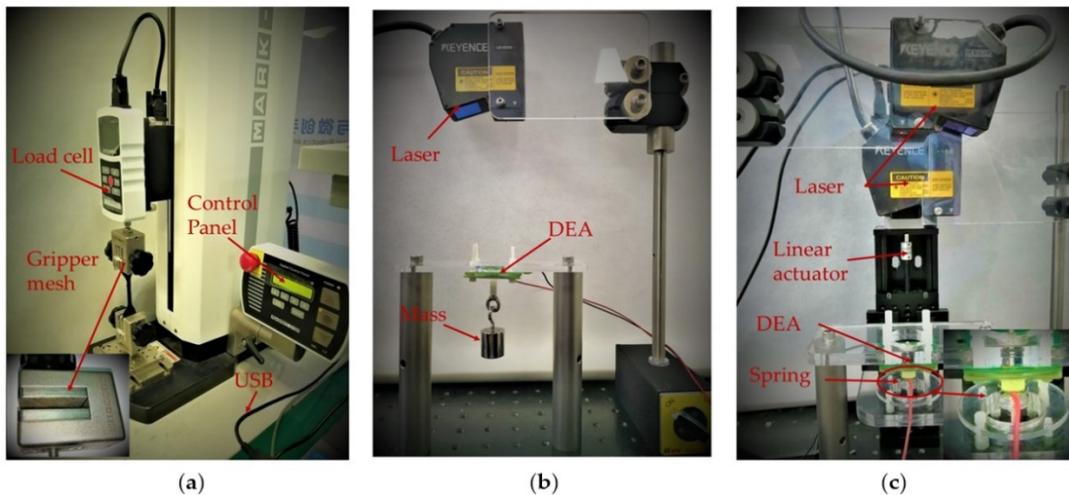

Figure S1. Real setups: (a) Tensile test; (b) Quasi-static DEA actuation test; (c) High-frequency test.

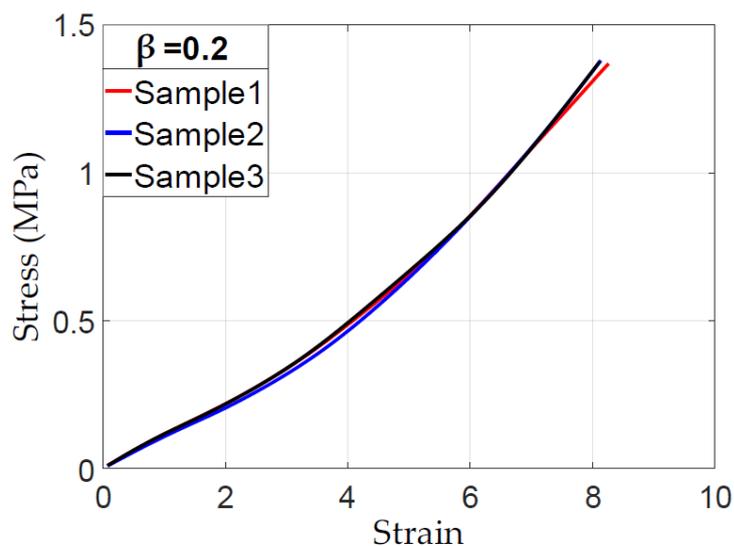

Figure S2. Uniaxial tensile stress–stretch curves from three repeated tensile pull-to-failure tests on the $\beta = 0.2:1$ specimen at a strain rate of 49.9 mm/min.

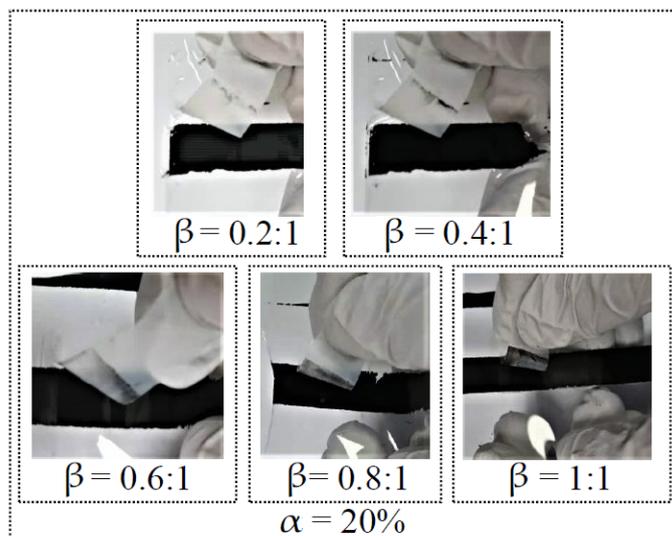

Figure S3. Adhesion experiments at different ratios β .

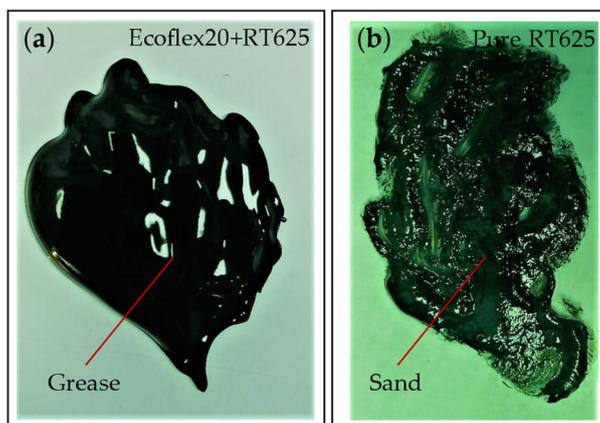

Figure S4. Curing for 2 hours: (a) Ecoflex20 + RT625; (b) Pure RT625.
