

Figure S1

Another evidence of debarking of *Quercus serrata* log by squirrel targeting on ascomycete anamorph. (a) Footprint of a squirrel and debarking on a *Q. serrata* log. (b) Debarked surface of *Q. serrata* log. Powdery anamorph spores were almost removed (probably by squirrel). (c) Footprint on snow. Photo by Yu Fukasawa on 14 February 2021.
