

Skliros et al., 2021. Figure S1. Growth kinetics of phage-resistant and phage susceptible strains in detail. Growth (average, \pm SE) of Control (phage susceptible strains; black circle; n=6), VaAphrodite1 strains (phage resistant strains to bacteriophage Aphrodite1; white circle; n=9), VaphiSt2 strains (phage resistant strains to bacteriophage ϕ St2; black triangle; n=9) and VaAres1 strains (phage resistant strains to bacteriophage Ares1; white triangle; n=9). Second diagram represents VaphiSt2 strains (phage resistant strains to bacteriophage ϕ St2; n=3).
