

Figure S1. Summary of cases used in this study for statistical analyses

Table S1. Shows the distribution of Norovirus co-infection with other pathogens

Variable	n (%)
Norovirus only	58(92.1)
Norovirus & Adenovirus	1(1.6)
Norovirus & Bacterial agents	4(6.3)

Table S2. Reagents used in the reverse transcription (RT) reaction

RT mix	Volume (μl)
5 X First strand Buffer	3
10mM dNTPs	1
Random Primer	0.5
100mM DTT	1
Ribonuclease Inhibitor	0.67
Super Script II RT	1
DW	2.83
Extracted RNA	10
