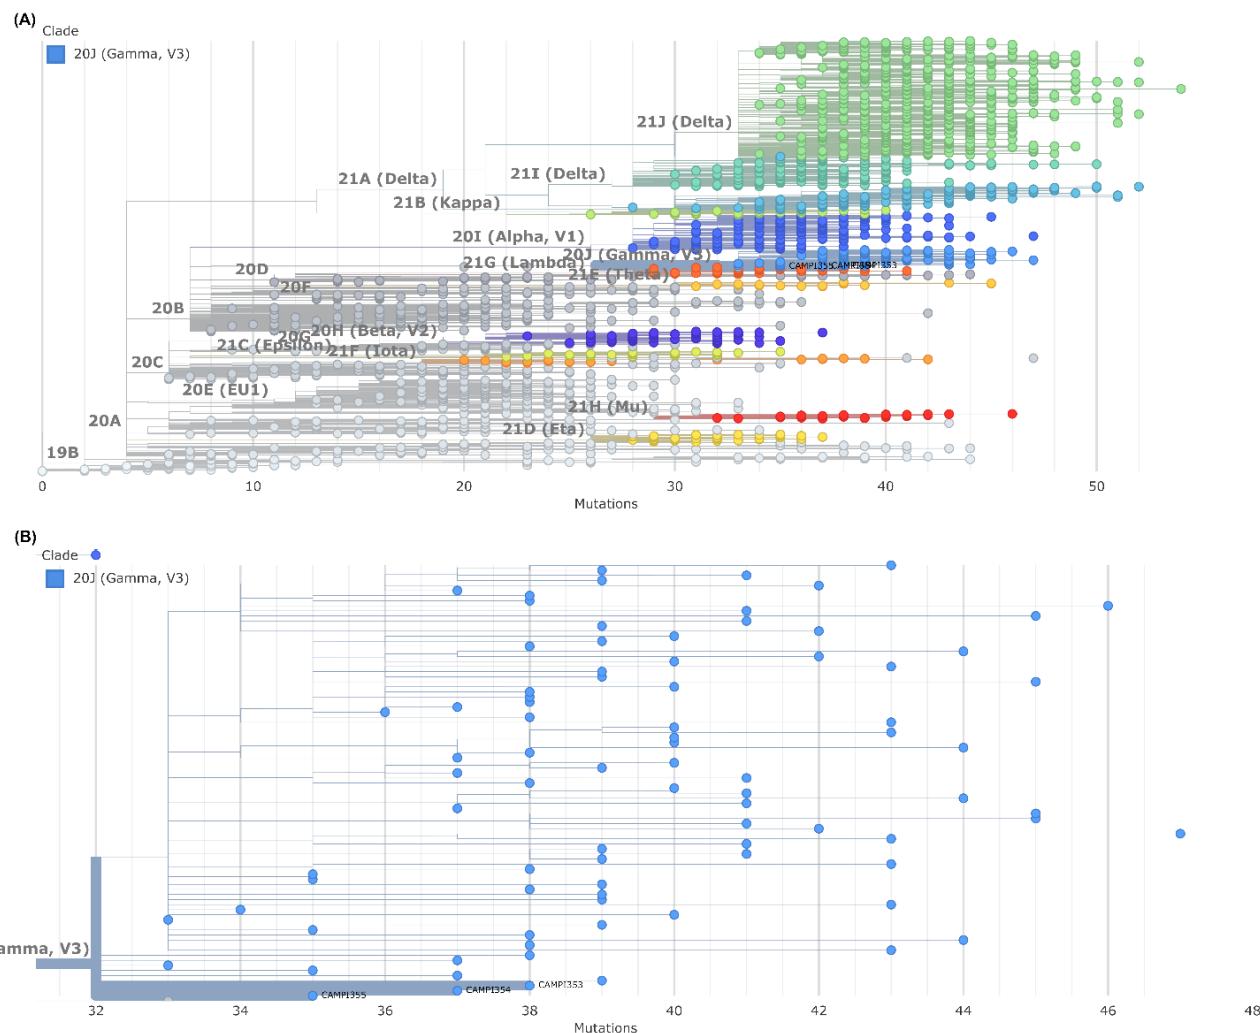

Figure S1. Maximum-likelihood phylogenetic analysis using NextStrain (Auspice tool(17)). (A) Phylogenetic tree including clades related with 20J (Gamma V3). (B) The phylogenetic analysis shows the three SARS-CoV-2 genomes sequences from the proband (i.e., CAMPI353, CAMPI354 and CAMPI355) in the clade 20J (Gamma, V3).

Table S1. Mutation signatures of Gamma (PANGO P.1 lineage or NextStrain clade 20J) from genome sequencing of SARS-CoV-2.
