

Table S6. Length distribution of full-length sequencing reads before and after correction with Illumina RNA-Seq data.

Sample	Type	Total nucleotides	Total number	Mean length	Min length	Max length	N50	N90
R	Before correct	464072319	212319	2186	198	13823	2643	1399
	After correct	463495705	212319	2184	182	12987	2641	1398
S	Before correct	536642204	183681	2922	181	14634	3429	1888
	After correct	535777939	183681	2917	182	14621	3420	1887
