

Supporting Material

Supplement Figure S1. Effect of BDTL100 on *B. subtilis* membranes lipid packing state after 5 (left) and 20 (right) minutes, respectively. Top panels show phase contrast, followed by BDTL100 and Nile red fluorescence. Bottom shows merge. Scale bar is set to 10 μm.

Supplement Figure S2. Cytotoxicity of BDTL049 at varying concentrations against three different human cell lines *in vitro*. Data represent biological replicates.
