

Supplementary Figure 1

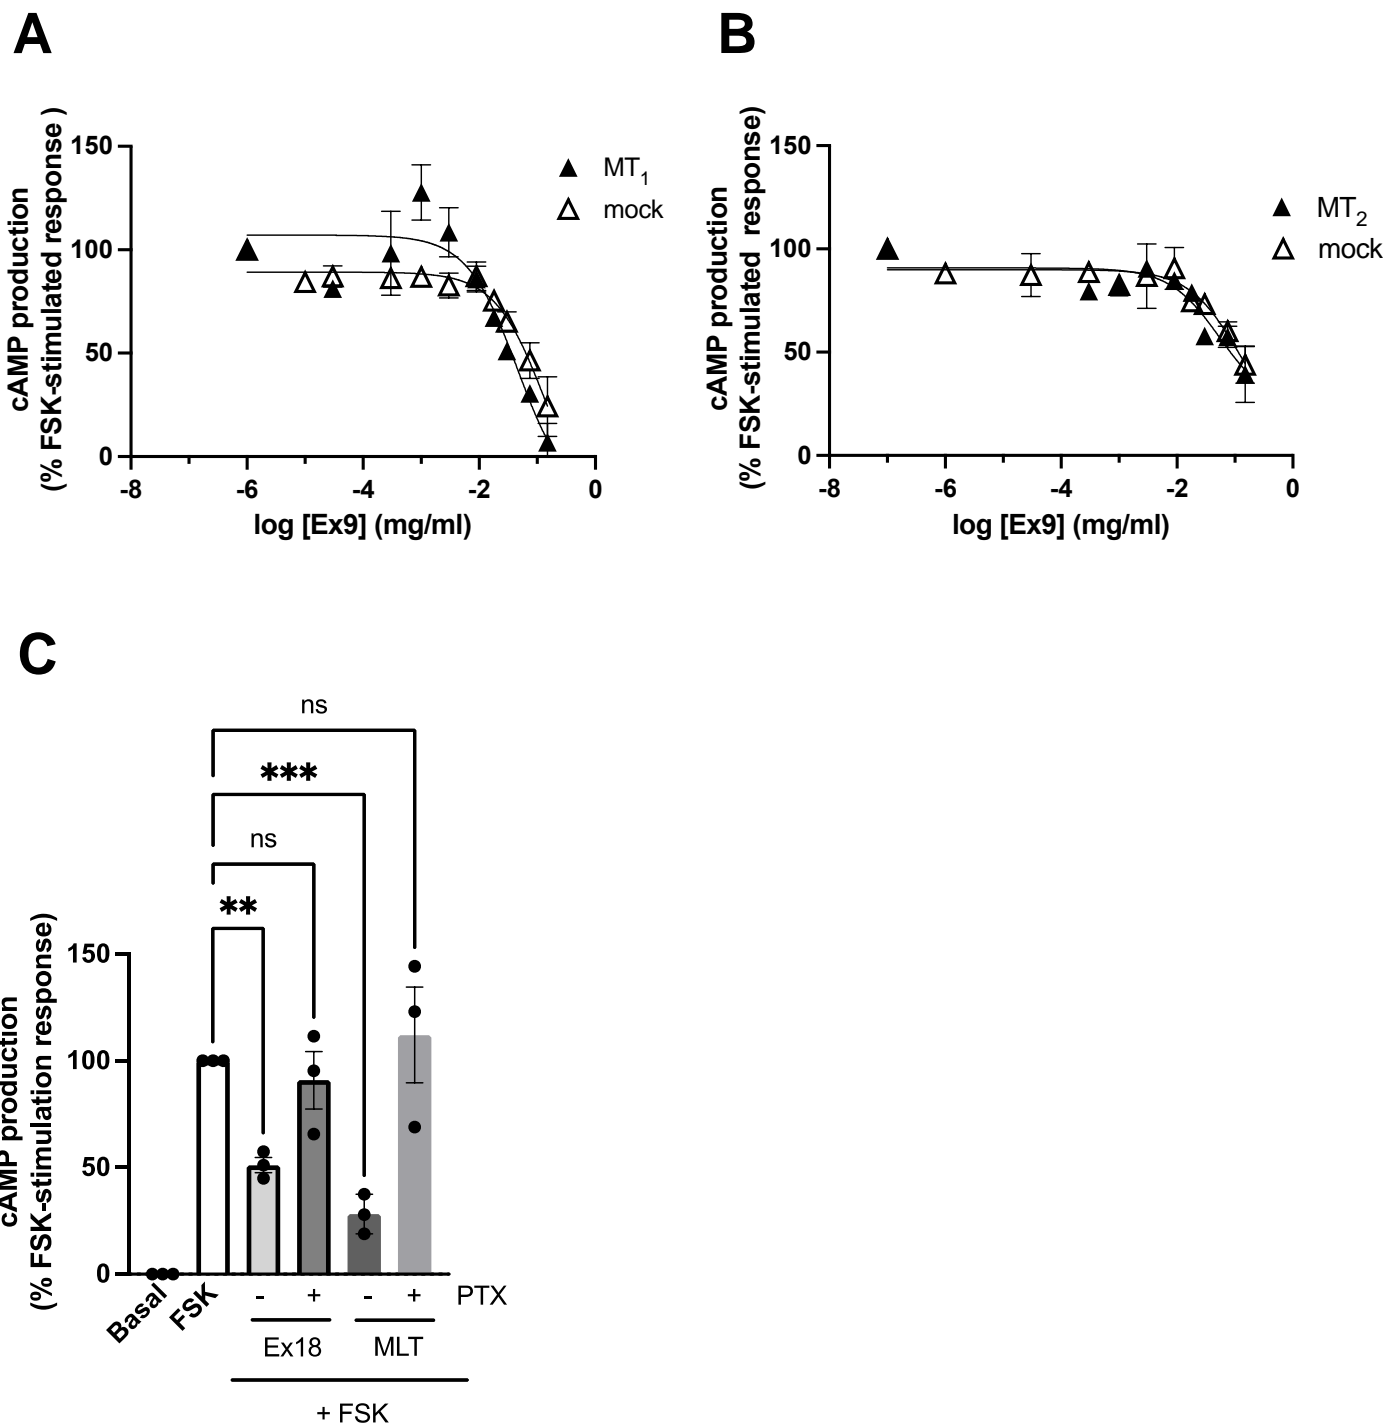

Supp Figure 1: Effect of maltodextrin on MT₁ (A) and MT₂ (B) receptors. Crude membrane preparations were incubated with increasing concentrations of maltodextrin and 100 pM of 2-[¹²⁵I]-MLT. Data are expressed as mean ± SEM, n = 2.

Supplementary Figure 2

Supp. Figure 2. Experimental controls of extracts. The interference of extract colour (**A**), cell viability (**B**) and the maltodextrin additive (**C**) were evaluated in cAMP and MTT assays. All extracts and maltodextrin were tested at 0.16 mg/ml. **Ex18** was used at 0.005 mg/ml. Data are expressed as mean \pm SEM of one experiment performed in triplicates (A,C) or 3 independent experiments performed in duplicates (B). (*p < 0.05; **p < 0.01; ****p < 0.0001; One-way ANOVA). Extracts selected for functional studies are labelled with a black square.

Supplementary Figure 3

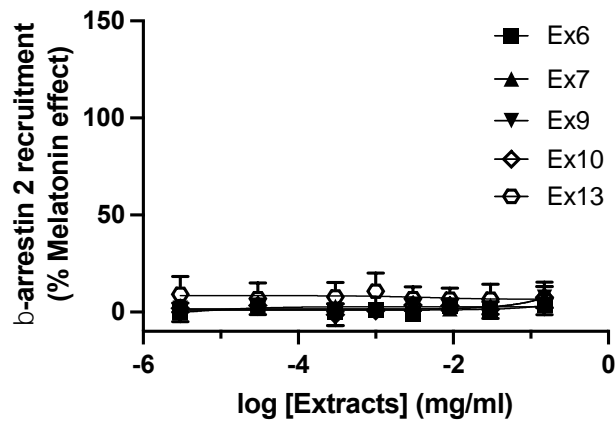

Supp. Figure 3: Effect of selected plant extracts on forskolin-stimulated cAMP production. Effect of increasing concentrations of **Ex9** on HEK293 empty vector transfected cells (mock) vs. HEK293 cells expressing MT₁ (**A**) or MT₂ (**B**) receptors. Data are expressed as mean \pm SEM, n = 3. All experiments were performed in triplicates. (**C**) **G_i protein-dependent effect of *Pistacia vera*** in HEK cells expressing MT₁ receptors. Cells were pre-treated or not overnight with *Pertussis toxin* (PTX) (10 ng/ml) and stimulated with **MLT** or **Ex18**. Data are normalized to maximal effect of forskolin-stimulated response and are presented as mean \pm S.E.M. of 3 experiments performed in triplicates. One way ANOVA (**p < 0.01, ***p < 0.001, ns, not significant).

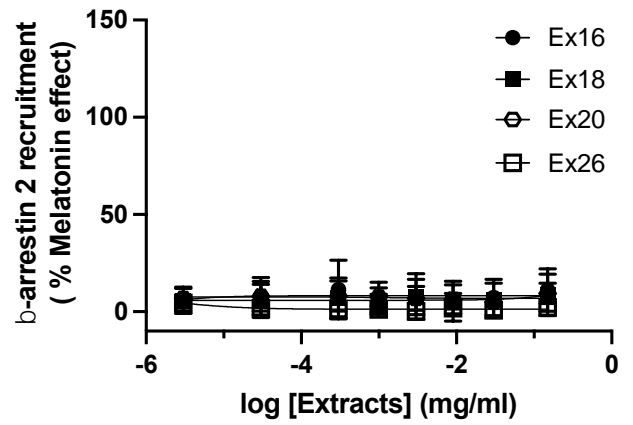

Supplementary Figure 4

MT₁

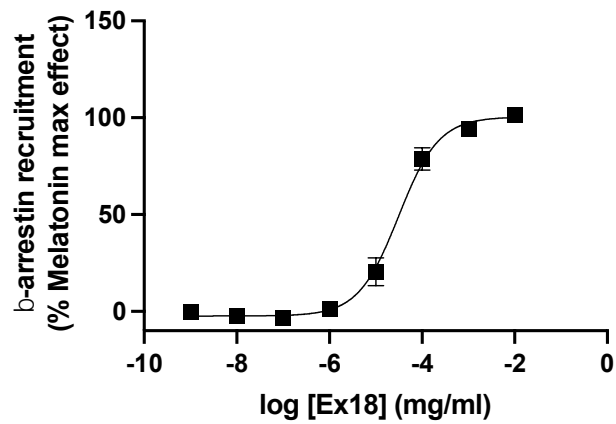

A

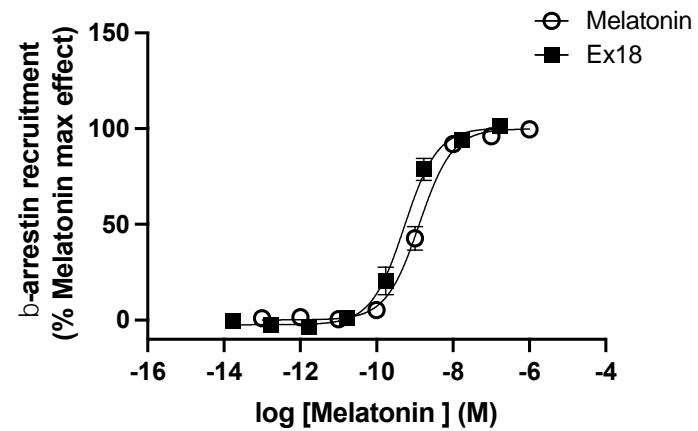

B

C

D

Supp. Figure 4. Effect of selected plant extracts on β -arrestin2 recruitment. Concentration-response curves of selected plant extracts (**A, B**) and **Ex18** (**C, D**) were performed in transient HEK293 cells co-transfected with Rluc-tagged MT₁ receptor and β -arrestin2 tagged with YFP. Data are expressed as percentage of MLT effect and represent 3 experiments performed in triplicates.
