

Supplementary

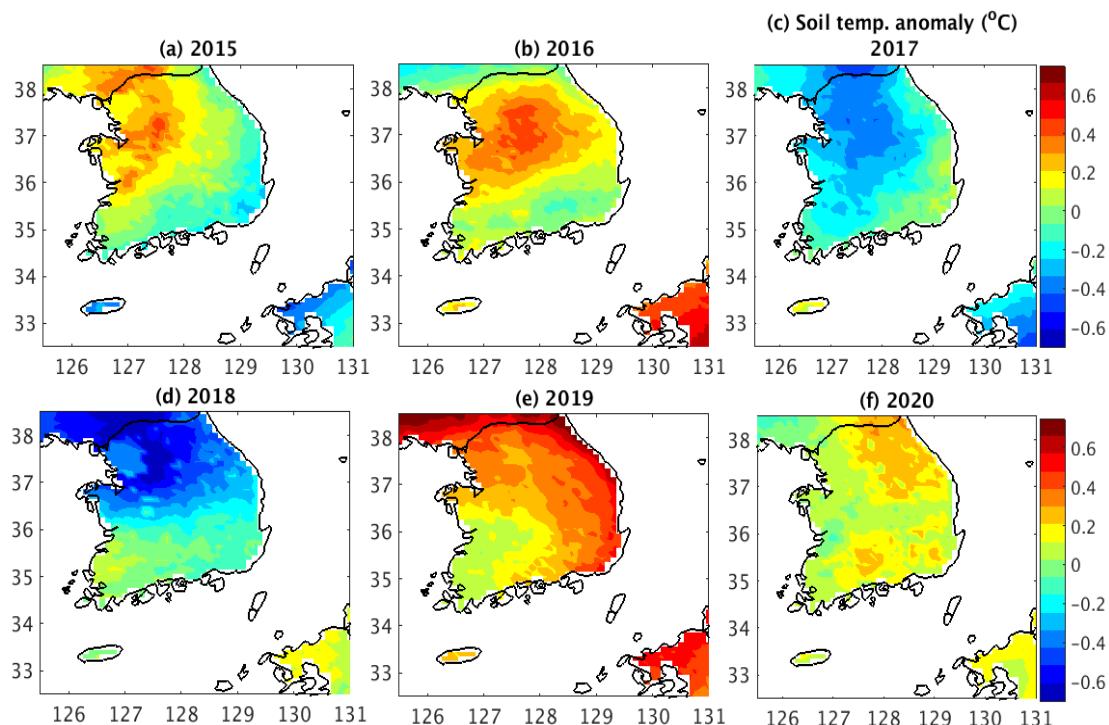

Figure S1. Spatial plot of soil temperature (10 cm depth) anomaly ($^{\circ}\text{C}$) during 2014-2020 (a-f).

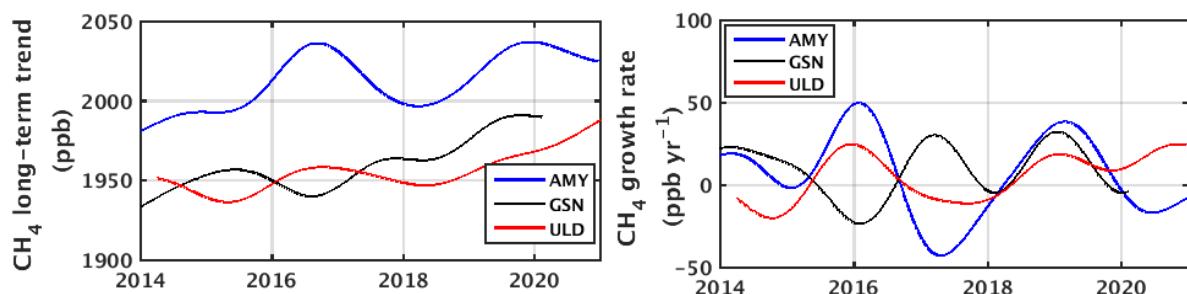

Figure S2. The plot demonstrates de-seasonalized long-term trend (left panel) and instantaneous growth rates (right panel) for AMY, Gosan (GSN 33.3 $^{\circ}\text{N}$, 126.16 $^{\circ}\text{E}$, 71.47 m) during Jan. 2014-Feb. 2020, and Ulleungdo (ULD, 37.48 $^{\circ}\text{N}$, 130.9 $^{\circ}\text{E}$, 220.9 m) during Jan. 2014-March 2021.
