

Figure S1. The network architecture corresponding to decision fusion

Table S1: The performance of DA-IMRN and AutoCNN when the ratio of pixels for training is set to be 4.20% (over the PU dataset).

	DA-IMRN	AutoCNN
<b>OA (%)</b>	85.03	84.63
<b>AA (%)</b>	81.04	80.87
<b>Kappa</b>	0.811	0.800
