

Table S1. Details of legume allergens (WHO/IUIS Allergen database (allergen.org)).

Species	Allergen	Protein family
<i>Arachis hypogaea</i> (Peanut)		
	Ara h 1	Cupin (Vicillin-type, 7S globulin)
	Ara h 2	Conglutin (2S albumin)
	Ara h 3	Cupin (Legumin-type, 11S globulin, Glycinin)
	Ara h 4	renamed to Ara h 3.02, number not available for future submissions
	Ara h 5	Profilin
	Ara h 6	Conglutin (2S albumin)
	Ara h 7	Conglutin (2S albumin)
	Ara h 8	Pathogenesis-related protein, PR-10, Bet v 1 family member
	Ara h 9	Nonspecific lipid-transfer protein type 1
	Ara h 10	16 kDa oleosin
	Ara h 11	14 kDa oleosin
	Ara h 12	Defensin
	Ara h 13	Defensin
	Ara h 14	Oleosin
	Ara h 15	Oleosin
	Ara h 16	nonspecific Lipid Transfer Protein 2
	Ara h 17	nonspecific Lipid Transfer Protein 1
<i>Glycine max</i> (Soybean)		
	Gly m 1	Hydrophobic protein from soybean
	Gly m 2	Defensin
	Gly m 3	Profilin
	Gly m 4	Pathogenesis-related protein, PR-10, Bet v 1 family member
	Gly m 5	Beta-conglycinin (vicilin, 7S globulin)
	Gly m 6	Glycinin (legumin, 11S globulin)
	Gly m 7	Seed biotinylated protein
	Gly m 8	2S albumin
<i>Lens culinaris</i> (Lentil)		
	Len c 1	Gamma-vicilin subunit
	Len c 2	Seed-specific biotinylated protein
	Len c 3	Nonspecific lipid transfer protein type 1
<i>Lupinus albus</i> (White lupin)		
	Lup an 5	Profilin
<i>Lupinus angustifolius</i> (narrow-leaved blue lupin)		
	Lup an 1	Conglutin beta (7S seed storage globulin, vicilin)
<i>Phaseolus vulgaris</i> (Green bean, French bean)		
	Pha v 3	Nonspecific lipid transfer protein type 1
<i>Pisum sativum</i> (Pea)		
	Pis s 1	Vicilin
	Pis s 2	Convicilin
	Pis s 3	nsLTP

<i>Vigna radiata</i> (Mung bean)	
Vig r 1	Pathogenesis-related protein, PR-10, Bet v 1 family member
Vig r 2	8S Globulin (Vicilin)
Vig r 3	Renamed to Vig r 2.0201
Vig r 4	Seed albumin
Vig r 5	Identified as fragment of Vig r 2
Vig r 6	Cytokinin-specific binding protein (CSBP), Bet v 1 family member

Table S2. Search queries for articles reporting legume sensitization in different electronic bibliographic databases.

Bibliographic database	Search query (performed on: 08-12-2017)
Scopus	(Article title, Abstract, Keywords): Prevalence AND (Food hypersensitivity OR Food allergy) AND (Fabaceae OR Legume OR Pea OR Lentil OR Bean OR Peanut OR Soybean OR Lupin OR Chickpea)
Web of Science	(All databases) TOPIC: (Prevalence AND (Food hypersensitivity OR Food allergy) AND (Fabaceae OR Legume OR Pea OR Lentil OR Bean OR Peanut OR Soybean OR Lupin OR Chickpea))
Pubmed	(All Fields): Prevalence AND (Food hypersensitivity [Mesh] OR Food allergy) AND (Fabaceae [Mesh] OR Legume OR Pea OR Lentil OR Bean OR Peanut OR Soybean OR Lupin OR Chickpea)
EMbase	(Article title, Abstract, Author Keywords): Prevalence AND (Food AND hypersensitivity OR (Food AND allergy)) AND (Fabaceae OR Legume OR Pea OR Lentil OR Bean OR Peanut OR Soybean OR Lupin OR Chickpea)

Table S3. Search queries for peanut allergen sensitization in different electronic bibliographic databases.

Bibliographic database	Search query (performed on: 27-04-2018)
Scopus	(Article title, Abstract, Keywords): Sensitization AND "Ara h"
Web of Science	(All databases) TOPIC: Sensitization AND "Ara h"
Pubmed	(All Fields): (Sensitization AND "Ara h")
EMbase	(Article title, Abstract, Author Keywords): Sensitization AND "Ara h"

Table S4. Overview of articles (n = 42) investigating legume sensitization and relative and absolute peanut consumption values taken from EFSA, GEMS and WWEIA consumption surveys. Values are corrected for amount of peanut protein (25%).

Authors	Nation	Study size	Reported age in years (mean or range)	Reported prevalence (%)	Peanut protein consumption (g/kg bw/day)	Peanut protein consumption (g/day)	Average percentage peanut consumers (%)
