

**Table S1.** Lipid profile of subjects assigned to low-fat/low-cholesterol diet and high-fat/high-cholesterol diet.

| Variables/Trial                                  | Last Visit Levels |             |              |             |
|--|-------------------|-------------|--------------|-------------|
|  | High-Fat Diet     |             | Low-Fat Diet |             |
|  | N                 | Mean (SD)   | N            | Mean (SD)   |
| Chisholm 1994 [21]                               |                   |             |              |             |
| Total cholesterol, mmol/L                        | 19                | 6.36 (0.98) | 19           | 5.96 (0.75) |
| Triglycerides, mmol/L                            |                   | 1.49 (0.76) |              | 1.55 (0.78) |
| High-density lipoprotein cholesterol, mmol/L     |                   | 1.44 (0.38) |              | 1.33 (0.35) |
| Low-density lipoprotein cholesterol, mmol/L      |                   | 4.22 (0.93) |              | 3.95 (0.70) |
| Very-low-density lipoprotein cholesterol, mmol/L |                   | 0.56 (0.41) |              | 0.57 (0.37) |

SD, standard deviation.

**Table S2.** Lipid profile of subjects assigned to omega-3 fatty acids and placebo.

| Variables/Trial                                  | Last Visit Levels         |             |               |             |
|--|---------------------------|-------------|---------------|-------------|
|  | Omega-3 Fatty Acids Group |             | Placebo Group |             |
|  | N                         | Mean (SD)   | N             | Mean (SD)   |
| Balestrieri 1996 [11]                            |                           |             |               |             |
| Total cholesterol, mmol/L                        |                           | 7.75 (1.27) |               | 7.80 (1.14) |
| Triglycerides, mmol/L                            |                           | 1.02 (0.29) |               | 1.26 (0.66) |
| High-density lipoprotein cholesterol, mmol/L     |                           | 1.37 (0.54) |               | 1.34 (0.47) |
| Low-density lipoprotein cholesterol, mmol/L      |                           | 5.89 (1.29) |               | 5.87 (1.34) |
| Apolipoprotein A-I, g/L                          |                           | 1.27 (0.47) |               | 1.25 (0.42) |
| Apolipoprotein B100, g/L                         |                           | 2.04 (0.42) |               | 2.05 (0.42) |
| Chan 2016 [20]                                   |                           |             |               |             |
|  | 20                        |             | 20            |             |
