Sex-Dependent Mediation of Leptin in the Association of Perilipin Polymorphisms with BMI and Plasma Lipid Levels in Children

Claudia Vales-Villamarín ¹, Jairo Lumpuy-Castillo ², Teresa Gavela-Pérez ³, Olaya de Dios ¹, Iris Pérez-Nadador ¹, Leandro Soriano-Guillén ³ and Carmen Garcés ^{1,*}

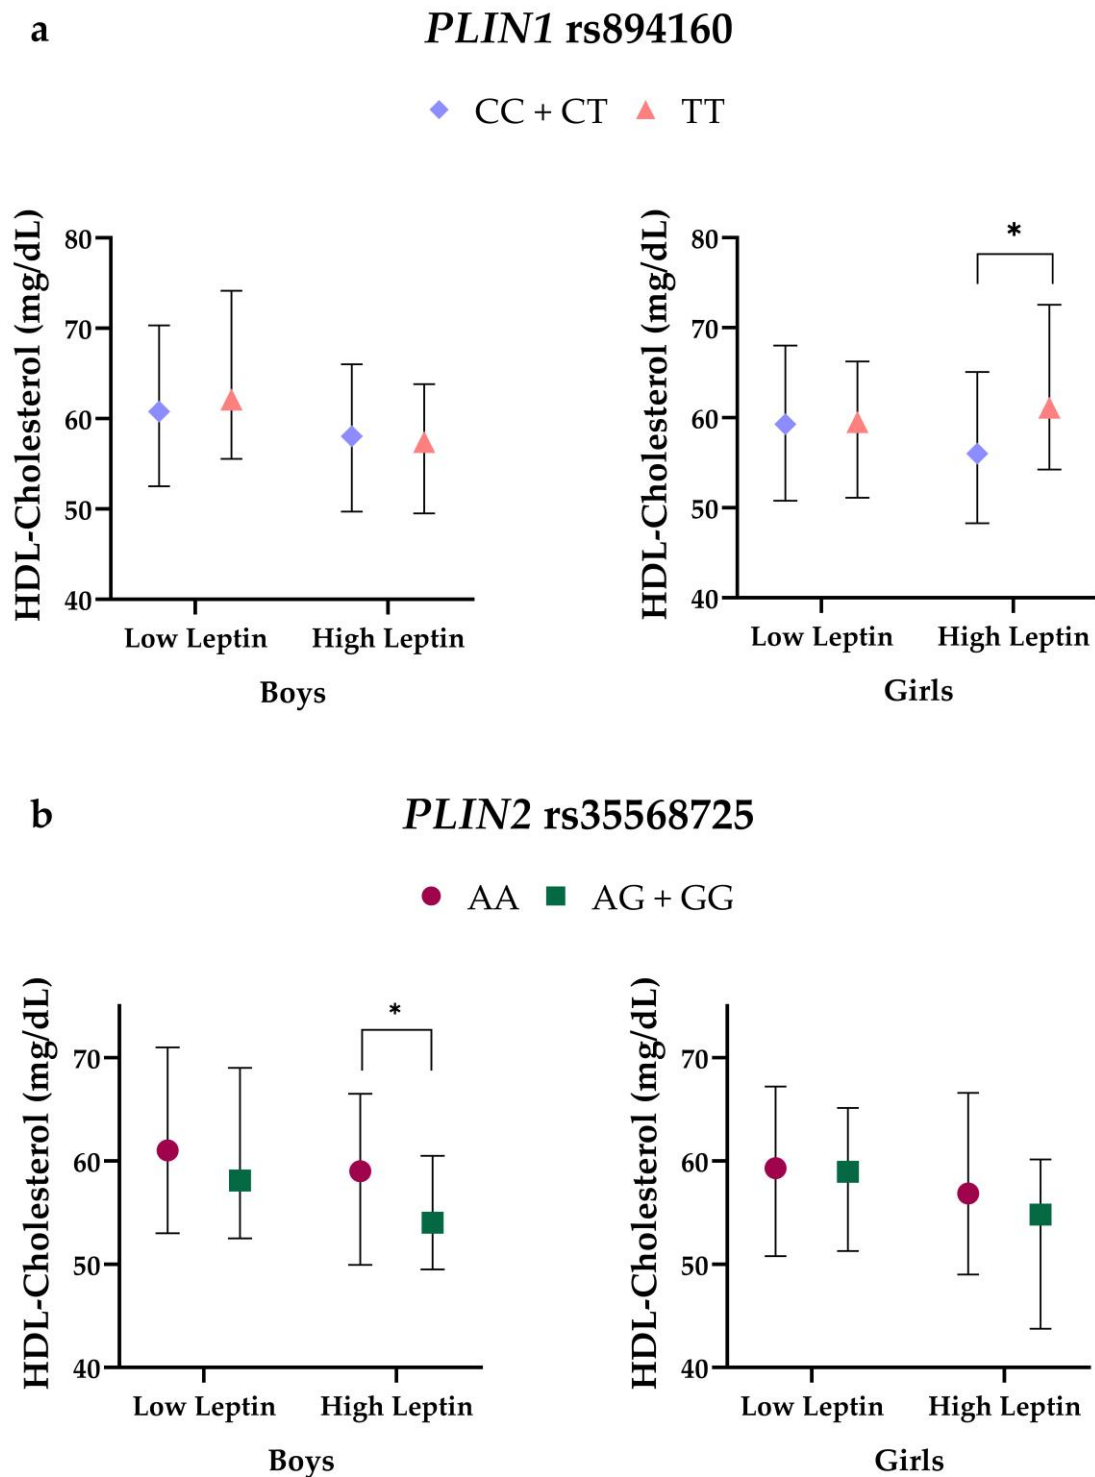

Figure S1. (a) HDL-cholesterol levels of *PLIN1*rs894160 genotypes in boys and girls according to levels of leptin; (b) HDL-cholesterol levels of *PLIN2*rs35568725 genotypes in boys and girls by leptin levels. Values are expressed as median and interquartile range. *p*-value: Mann–Whitney U test: * *p*-value < 0.05; ** *p*-value < 0.01.
