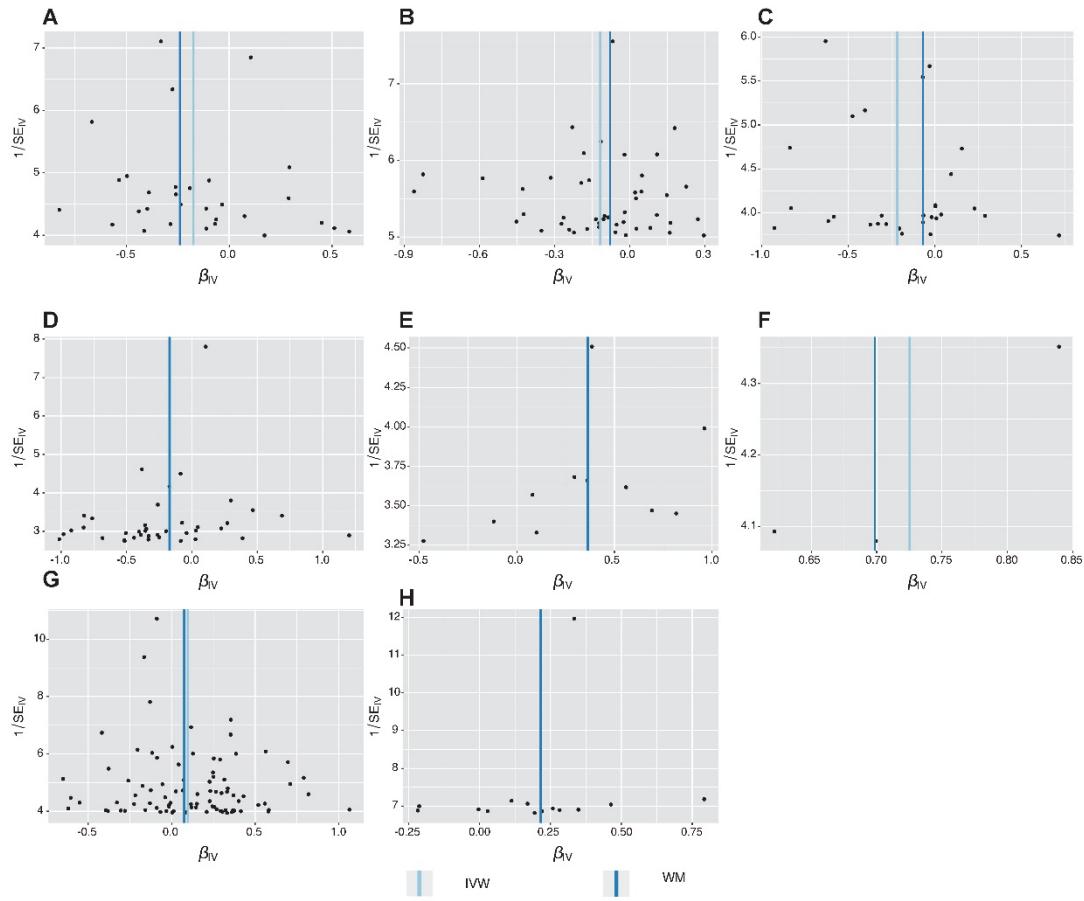

Figure S1: The figure displays the results of funnel plots in Mendelian randomization (MR). Funnel plot shows the estimates of precision ($1/\text{SE}$) and Wald ratios for each SNP. A: Funnel plot for cereal intake and multisite chronic pain; B: Funnel plot for cheese intake and multisite chronic pain; C: Funnel plot for dried fruits intake and multisite chronic pain; D: Funnel plot for fresh fruits intake and multisite chronic pain; E: Funnel plot for pork intake and multisite chronic pain; F: Funnel plot for poultry intake and multisite chronic pain; G: Funnel plot for salt added in food and multisite chronic pain; H: Funnel plot for alcohol intake frequency and multisite chronic pain. IVW, inverse-variance-weighted; WM, weight median.
