

Supplementary Material - Dietary Inflammatory Index, Sleep Duration and Quality: A Systematic Review

Christle Coxon ¹, Jun Nishihira ² and & Piril Hepsomali ³

The Agency for Healthcare Research and Quality (AHRQ) checklist questions (Rostom et al., 2014)

Q1: Define source of information

Q2: List inclusion and exclusion criteria for subjects or refer to previous publications

Q3: Indicate whether subjects were consecutive if not population based. Whether subjects are representative of the average in the community?

Q4: Indicate time period used for identifying subjects

Q5: Indicate if evaluators of subjective components of study were masked to other aspects of the status of the participants

Q6: Is the examination method standard?

Q7: Describe any assessments undertaken for quality assurance purposes

Q8: Are the assessments and classification of caries index and BMI clearly stated and standard?

Q9: If any, explain any subject exclusions from analysis

Q10: Describe how confounding was assessed and/or controlled

Q11: Summarize patient response rates and completeness of data collection.
