

Table S1. Comparison of the proposed IMBs-DLLME pretreatment method and the traditional IAC pretreatment method.

Process	Vortex	Centrifugation	Clean-Up	Dilution	Nitrogen evaporation	Total
IAC	20 min ^a /10 mL ^b	5 min	42 min /2 mL	no need	60 min	127 min /12 mL
IMBs-DLLME	no need	no need	43 min /0.5 mL	2 min	no need	45 min /0.5 mL

^a The time consumed in this process. ^b The organic reagents consumed in this process.

Table S2. Detection results of real samples.

Sample	IAC ($\mu\text{g}/\text{kg}$)	IMBs-DLLME ($\mu\text{g}/\text{kg}$)
#1	84.1	91.5
#2	195.6	198.2
#3	197.7	200.1
#4	197.3	203.1
#5	191.3	186.3
#6	103.7	111.8
#7	61.5	67.1
