

Sequence logo showing the conservation of amino acids across 110 positions for various snake species. The x-axis represents positions -20 to 110. The y-axis lists species and transcript IDs. Each position has a stack of colored bars representing the frequency of each amino acid: I (grey), C (green), A (blue), Q (orange), E (red), T (yellow), G (light blue), D (dark blue), N (purple), S (pink), P (cyan), R (magenta), K (brown), and M (orange).
