

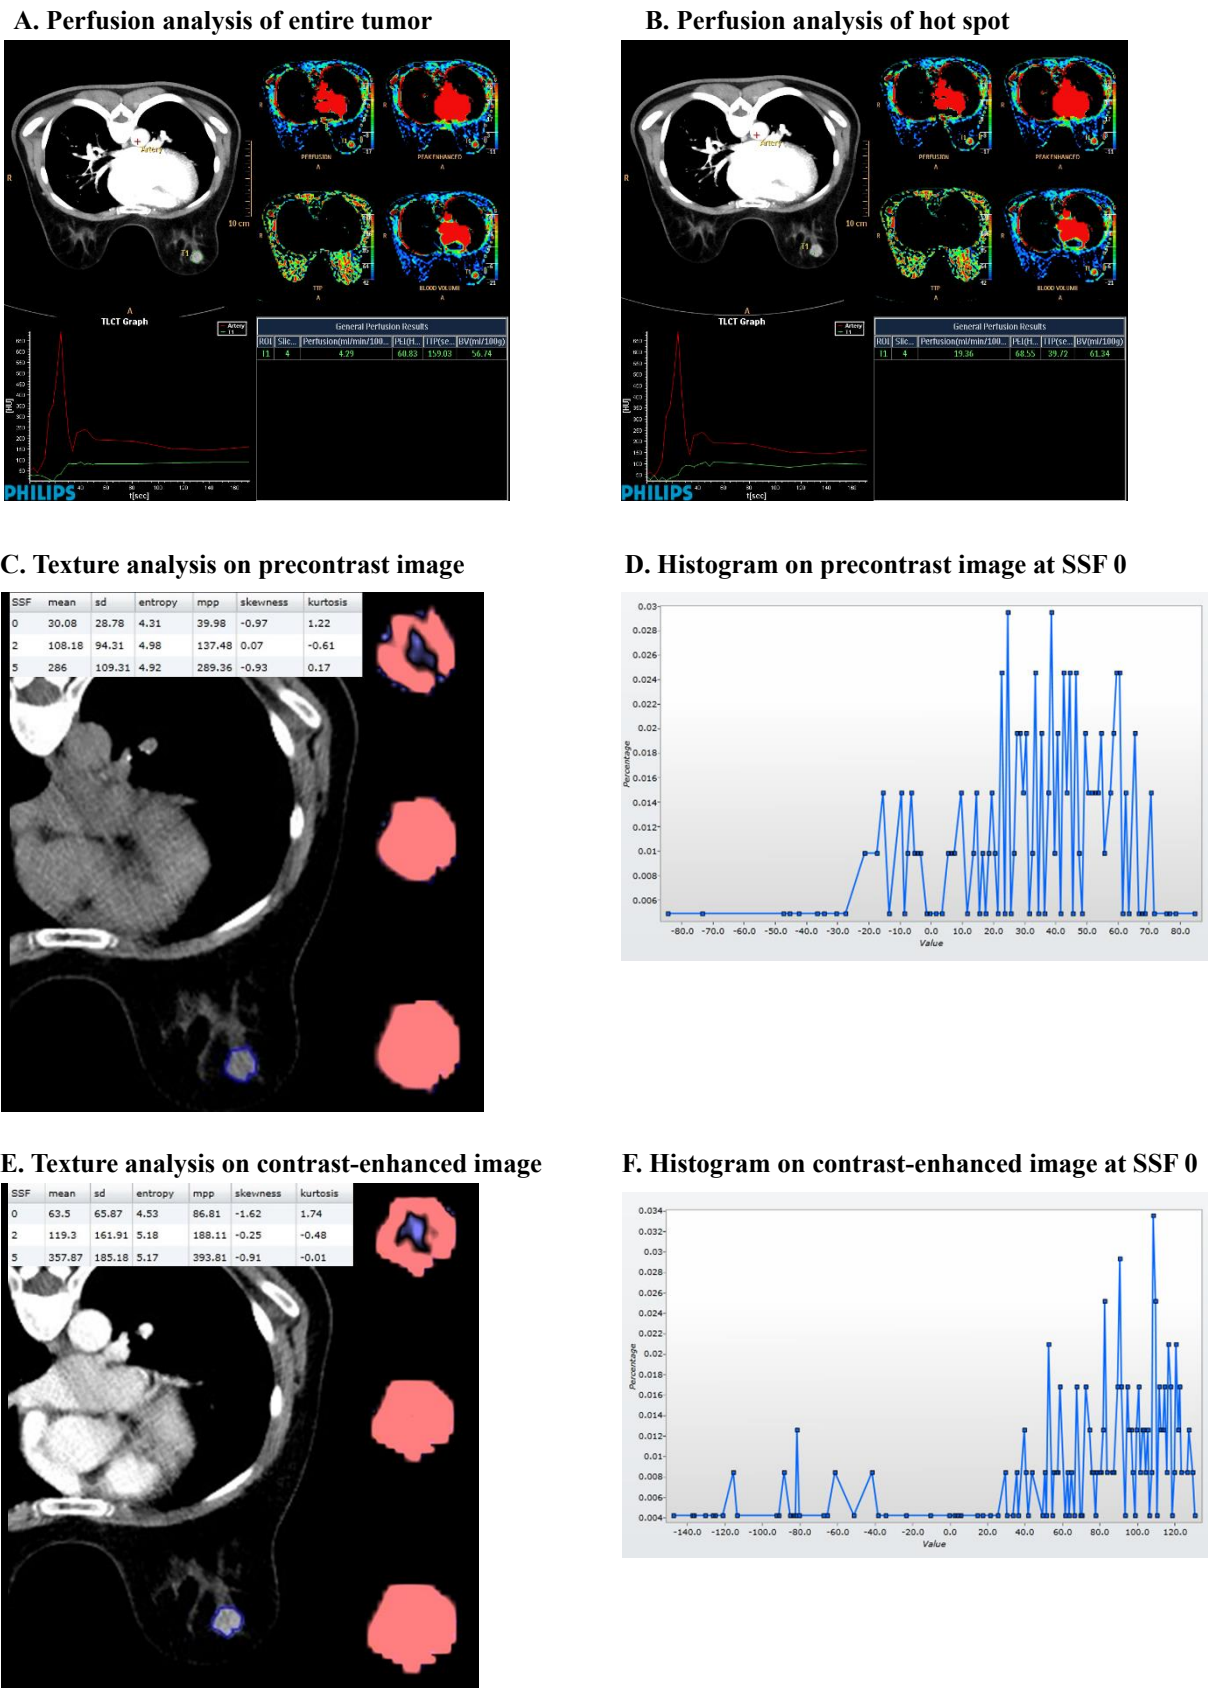

Figure S1. Perfusion and texture analyses on low-dose breast CT in luminal and triple-negative cancers.

(Panel A) Perfusion and texture analyses on low-dose breast CT in a 58-year-old woman with invasive ductal cancer of the left breast (ER+, PR+, HER2-, Ki67-, low grade, and luminal A cancer).

(Panel B) Perfusion and texture analyses on low-dose breast CT in a 52-year-old woman with invasive ductal cancer of the right breast (ER-, PR-, HER2-, Ki67+, high grade, and triple-negative cancer).

A. Perfusion analysis of entire tumor

B. Perfusion analysis of hot spot

C. Texture analysis on precontrast image

D. Histogram on precontrast image at SSF 0

E. Texture analysis on contrast-enhanced image

F. Histogram on contrast-enhanced image at SSF 0
