

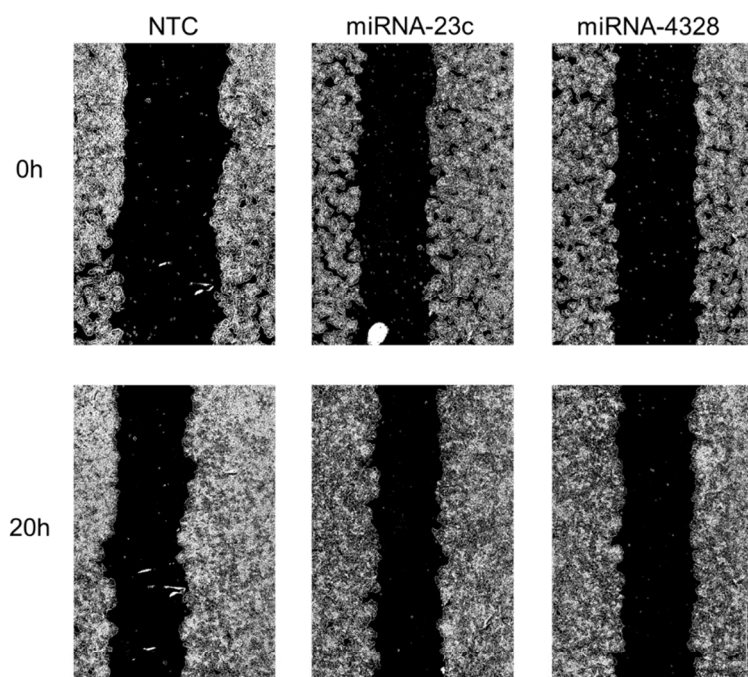

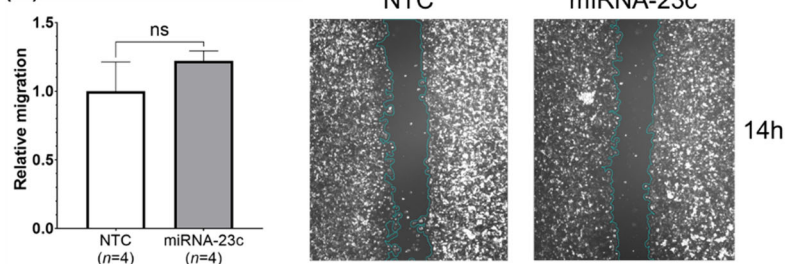

Figure 6S.

(a) 22Rv1

(b) PC-3

(c) PC-3

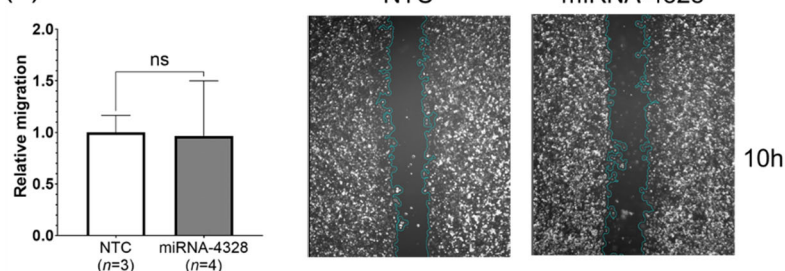

Figure S6. Wound healing assay of 22Rv1 and PC-3 cells overexpressing miRNA-23c or miRNA-4328. (a) Examples of wounds of 22Rv1 cells at baseline (0h) and after 20h. Examples of wounds of PC-3 cells overexpressing miRNA-23c (b) and miRNA-4328 (c). Graphs display the relative difference in wound area as compared to 0h. The wound area was quantified in Image J using a plugin for scratch wound healing assays. ns: $p > 0.05$, $n = 3-4$.
