

Statistical data

Comparative analyzes were performed using one-way analysis of variance (ANOVA). In the case of failure to meet the assumption of homogeneity of variance (verified with Levene's test), the Welch F test was used. Tukey's RIR test was used for multiple comparisons. The results were considered statistically significant when the calculated test probability met the inequality $p \leq 0.05$. The calculations were made in the Statistica 10.0 package by Statsoft Polska.

I. Fibre flax trials

Table S1. Post-hoc test for total length of the reference fiber flax varieties and HDH line in vegetation period 2019.

Varieties	Evea	Filea	Novea	HDH	Jan	Sara	Modran	Selena

Table S23. Welch test for total yield of the reference linseed varieties and R26 line in vegetation period 2019.

Varieties	Mean	N	Standard deviation	Min.	Max.	F Welch	p
CJ 1016	49,33	3	4,51	45	54		
Altess	38,00	3	9,85	30	49		
Festival	41,00	3	7,21	33	47		
Marquise	37,67	3	3,21	34	40		
Merlin	33,33	3	2,52	31	36		
Jantarol	36,67	3	5,86	30	41		
Bukoz	48,67	3	7,37	43	57		
R26	43,00	3	3,00	40	46		

The collected data do not allow to conclude that the compared varieties differ in average total yield.

Table S24. Welch test for total yield of the reference linseed varieties and R26 line in vegetation period 2020.

Varieties	Mean	N	Standard deviation	Min.	Max.	F Welch	p
CJ 1016	78,33	3	10,10	67,5	87,5	0,82	0,588
Altess	71,93	3	6,77	65,8	79,2		
Festival	78,87	3	10,73	70	90,8		
Marquise	62,23	3	20,40	41,7	82,5		
Merlin	61,93	3	8,36	54,2	70,8		
Jantarol	67,50	3	13,99	56,7	83,3		
Bukoz	70,00	3	10,42	60	80,8		
R26	66,10	3	14,04	50	75,8		

The collected data do not allow to conclude that the compared varieties differ in average total yield.

Table S25. Welch test for straw yield of the reference linseed varieties and R26 line in vegetation period 2019.

Varieties	Mean	N	Standard deviation	Min.	Max.	F Welch	p
CJ 1016	15,67	3	2,08	14	18	3,46	0,001
Altess	17,67	3	2,52	15	20		
Festival	21,67	3	5,03	17	27		
Marquise	15,33	3	1,53	14	17		
Merlin	16,00	3	1,00	15	17		
Jantarol	16,67	3	2,52	14	19		
Bukoz	21,00	3	3,61	18	25		
R26	20,00	3	2,00	18	22		

The collected data do not allow to conclude that the compared varieties differ in average total yield.

Table S26. Welch test for straw yield of the reference linseed varieties and R26 line in vegetation period 2020.

Varieties	Mean	N	Standard deviation	Min.	Max.	F Welch	p
CJ 1016	40,83	3	8,78	32,50	50,00	1,22	0,348
Altess	35,00	3	3,66	32,50	39,20		
Festival	43,33	3	5,83	39,20	50,00		
Marquise	30,57	3	10,84	19,20	40,80		
Merlin	33,33	3	4,15	29,20	37,50		
Jantarol	36,97	3	6,48	31,70	44,20		
Bukoz	42,23	3	5,71	35,80	46,70		
R26	41,97	3	10,40	31,70	52,50		

The collected data do not allow to conclude that the compared varieties differ in average total yield.

Table S27. Post-hoc test for seed yield of the reference linseed varieties and R26 line in vegetation period 2019.

Varieties	CJ 1016	Altess	Festival	Marquise	Merlin	Jantarol	Bukoz	R26
CJ 1016		0,001	0,001	0,210	0,000	0,018	0,142	0,066
Altess	0,001		1,000	0,775	1,000	1,000	0,874	0,973
