

**Figure S1.** Schematic representation of the *flamenco* locus and the regions where the specific primer pairs map. Map of the *flamenco* gene showing the *DIP1* gene, the *flam*<sup>BG02658</sup> (*flam*<sup>BG</sup>) insertion at the 5' end of the *flamenco* locus, and the positions of primers used to analyze *flamenco* primary transcripts expression (1-flam1;5-flam5).

**Table S1.** Primer sequences used in this study.
