

Figure S3. The Ck19-CreER^T and Opn-iCreER^{T2} drivers do not trigger recombination in hepatic stellate cells or immune cells.

Immunofluorescent detection of Desmin (a) and Cd45 (b) with tdTomato on liver sections of *Ck19-CreER-tdTomato* and *Opn-CreER-tdTomato* mice three weeks after tamoxifen injection. Arrow heads indicate Desmin+ and Cd45+ cells respectively.
