

## Predictive value of ***SLCO1B1*** c.521T>C polymorphism on observed changes in the treatment of 1136 statin-users

### Supplementary

Supplementary Table S1. Sample size calculation based on Link *et al.* (2008) in a population of patients receiving 80 mg of simvastatin daily.

	Controls	Cases	Total
T	157	93	250
C	23	77	100
Total	180	170	350
C allele proportion	13%	45%	
Needed sample size	39	41	80

Supplementary Table S2. Calculation Hardy Weinberg Equilibrium
