

Supplementary Material

Black Carbon and Particulate Matter Concentrations in an Eastern Mediterranean Urban Conditions – An Assessment Based on Integrated Stationary and Mobile Observations

Tareq Hussein, Shatha Saleh, Vanessa N. dos Santos, Huthaifah Abdullah, Brandon E. Boor

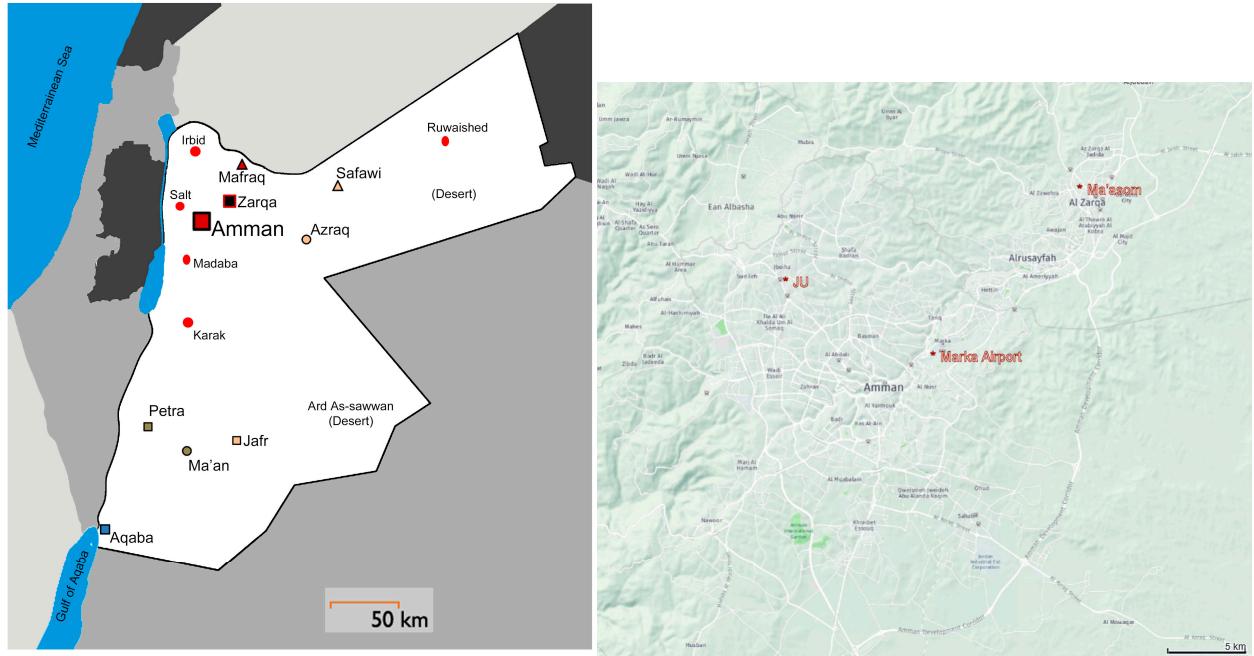

Figure S1: Map of Jordan (left) and map showing Amman and Zarqa city street maps (right).

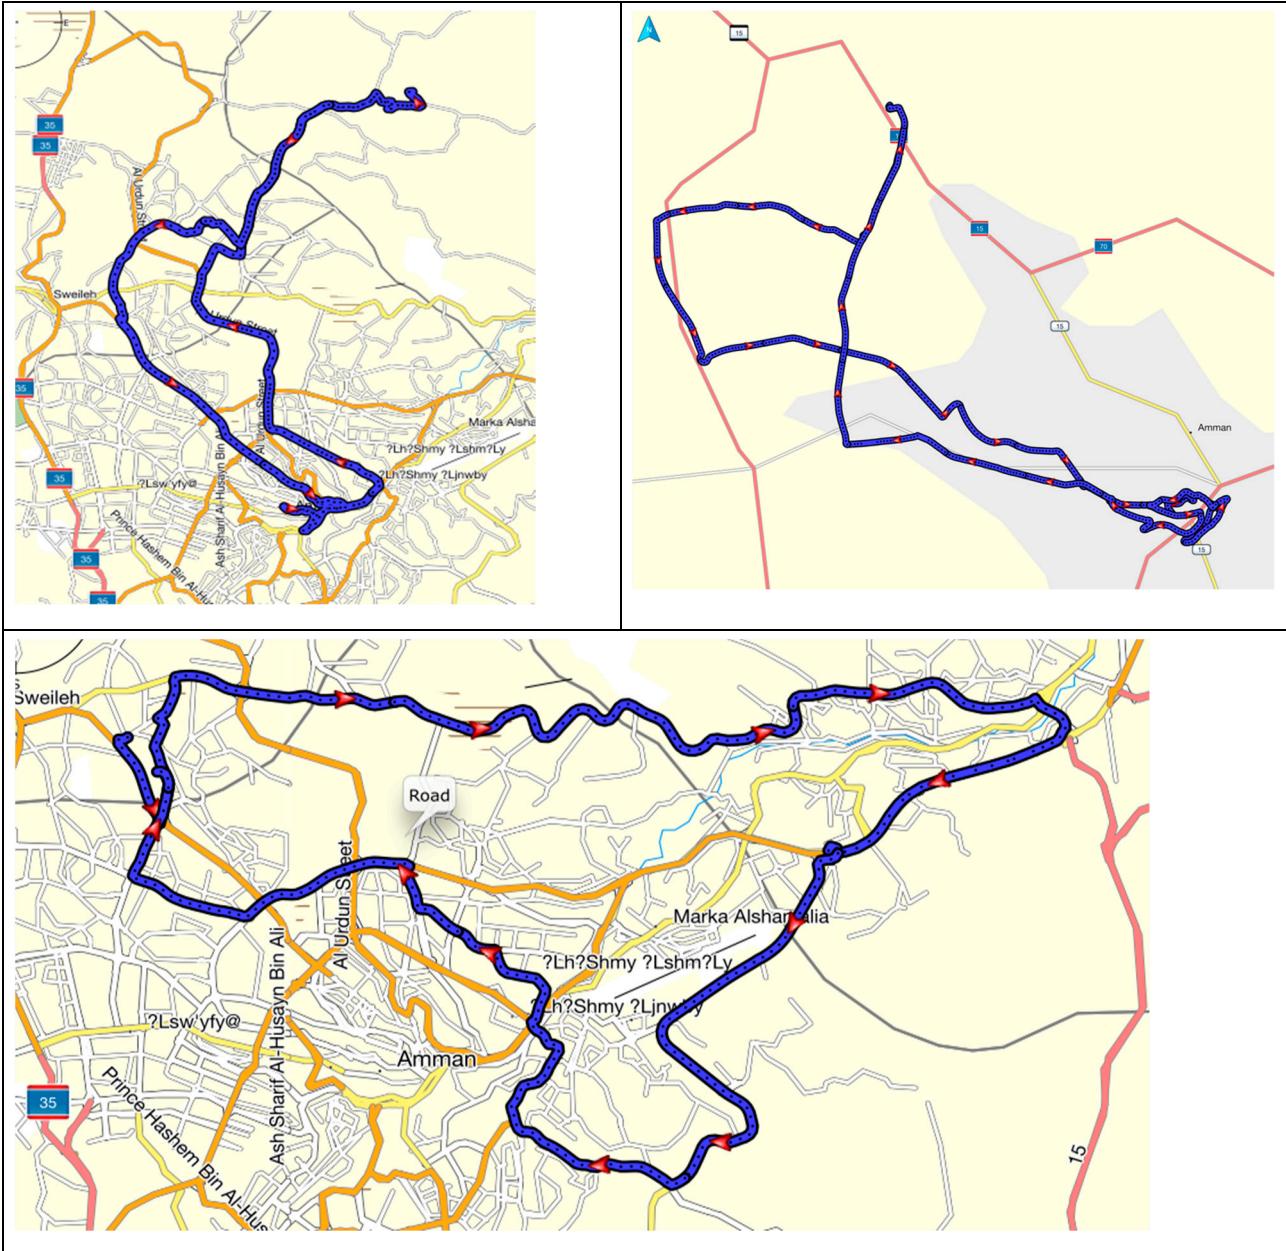

Figure S2: Maps illustrating some of the routes taken during mobile measurements: (a) route made on May 29th driving on Amman main streets, walking in city center, and driving at the background remote location between Amman and Zarqa, (b) route made on June 1st driving on Amman main streets and city center, and (c) route made on June 2nd driving on main roads connecting Amman and Zarqa.

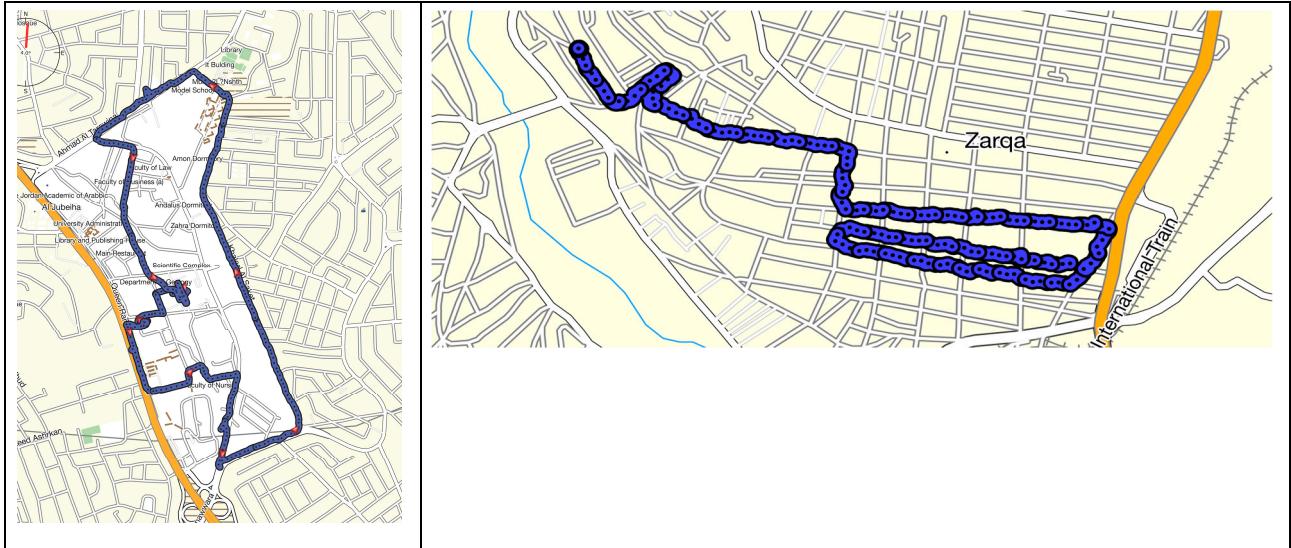

Figure S3: Maps illustrating some walking scenarios: (a) the campus of the University of Jordan on May 29th and June 1st and 2nd and (b) Zarqa streets on June 3rd.

Table S1: Size-fractionated particle number concentrations [cm⁻³] as measured by the mobile setup during different scenarios.

	Size fraction	Mean	Std	25%	median	75%	#
