

Frratum

## Erratum: Hůnová, I. Ambient Air Quality in the Czech Republic: Past and Present. *Atmosphere* 2020, 11, 214

Iva Hůnová D

Ambient Air Quality Department, Czech Hydrometeorological Institute, Na Šabatce 17, 143 06 Praha 4, Czech Republic; iva.hunova@chmi.cz

**Text Correction** 

There was an error in the original article [1]. With 3150 kilotons in 1985, i.e., a full 203 kg per person per year in 1985,  $SO_2$  emissions in the CR were the highest in Europe, 2.48 times higher than in Western Europe per unit of gross national product (GNP) [23].

A correction has been made to 2.1. Emission Sources and Source Areas, Paragraph 4: With 3150 kilotons in 1985, i.e., a full 203 kg per person per year in 1985, SO<sub>2</sub> emissions in the Czech-Slovak Federal Republic (CSFR) were the highest in Europe, 2.48 times higher than in Western Europe per unit of gross national product (GNP) [23].

The author apologizes for any inconvenience caused and state that the scientific conclusions are unaffected. The original article has been updated.

Conflicts of Interest: The author declares no conflict of interest.
