1. Physicochemical analysis

Among soil physicochemical properties, soil pH (H_2O), soil organic matter (SOM), and cation exchange capacity (CEC) were analyzed with 1:5 ratio, Walkley-Black wet digestion method and 1 M ammonium acetate (pH 7.0) extraction (Kjeldahl method), according to the Methods of Soil Chemical Analysis suggested by the National Institute of Agricultural Science of Rural Development Administration, Republic of Korea [1]. Soil pH (NaF), phosphorus retention capacity (PRC), and selective extraction were analyzed following the Soil Survey Laboratory Method Manual [2]. Soil pH (H_2O , NaF) was measured using a pH meter (Orion star A211, Thermo Scientific, USA); phosphorus of PRC was measured using a UV/Vis spectrometer (Lambda 25, PerkinElmer, USA); and selective extraction (Al, Fe) were measured using an inductively coupled plasma optical emission spectrometer (JY138 Ultrace, Jobin Yvon, France).

Table S1. Summary of physicochemical properties in the topsoil and subsoil samples collected from citrus orchard and forestland sites in Jeju Island, South Korea

| Site | | pH | | SOM ^a | CEC ^b | P _{RC} ^c | Al _o +1/2Fe _o |
|----------------|---------|------------------|------|------------------|------------------|------------------------------|-------------------------------------|

A: Topsoil, B: Subsoil, C: Topsoil/Subsoil ratio (**bold**).

Table S3. Principal component analysis (PCA) results of phosphorus and heavy metals in the topsoil collected from citrus orchard sites in Jeju Island, South Korea

| Component | PC 1 | PC 2 |
|-------------------------|--------------|--------------|
| Cd | 0.848 | 0.119 |
| TP | 0.841 | -0.045 |
| Zn | 0.833 | 0.091 |
| Pb | 0.793 | 0.164 |
| Cu | 0.787 | 0.226 |
| Cr | 0.695 | 0.465 |
| Al | 0.065 | 0.891 |
| Ni | 0.153 | 0.866 |
| Total variance (%) | 53.3 | 18.5 |
| Cumulative variance (%) | 53.3 | 71.8 |

Extraction method: Principal component analysis

Rotation method: Varimax with Kaiser Normalization

(PC1–principal component 1, PC2–principal component 2)
