

Supplementary Materials

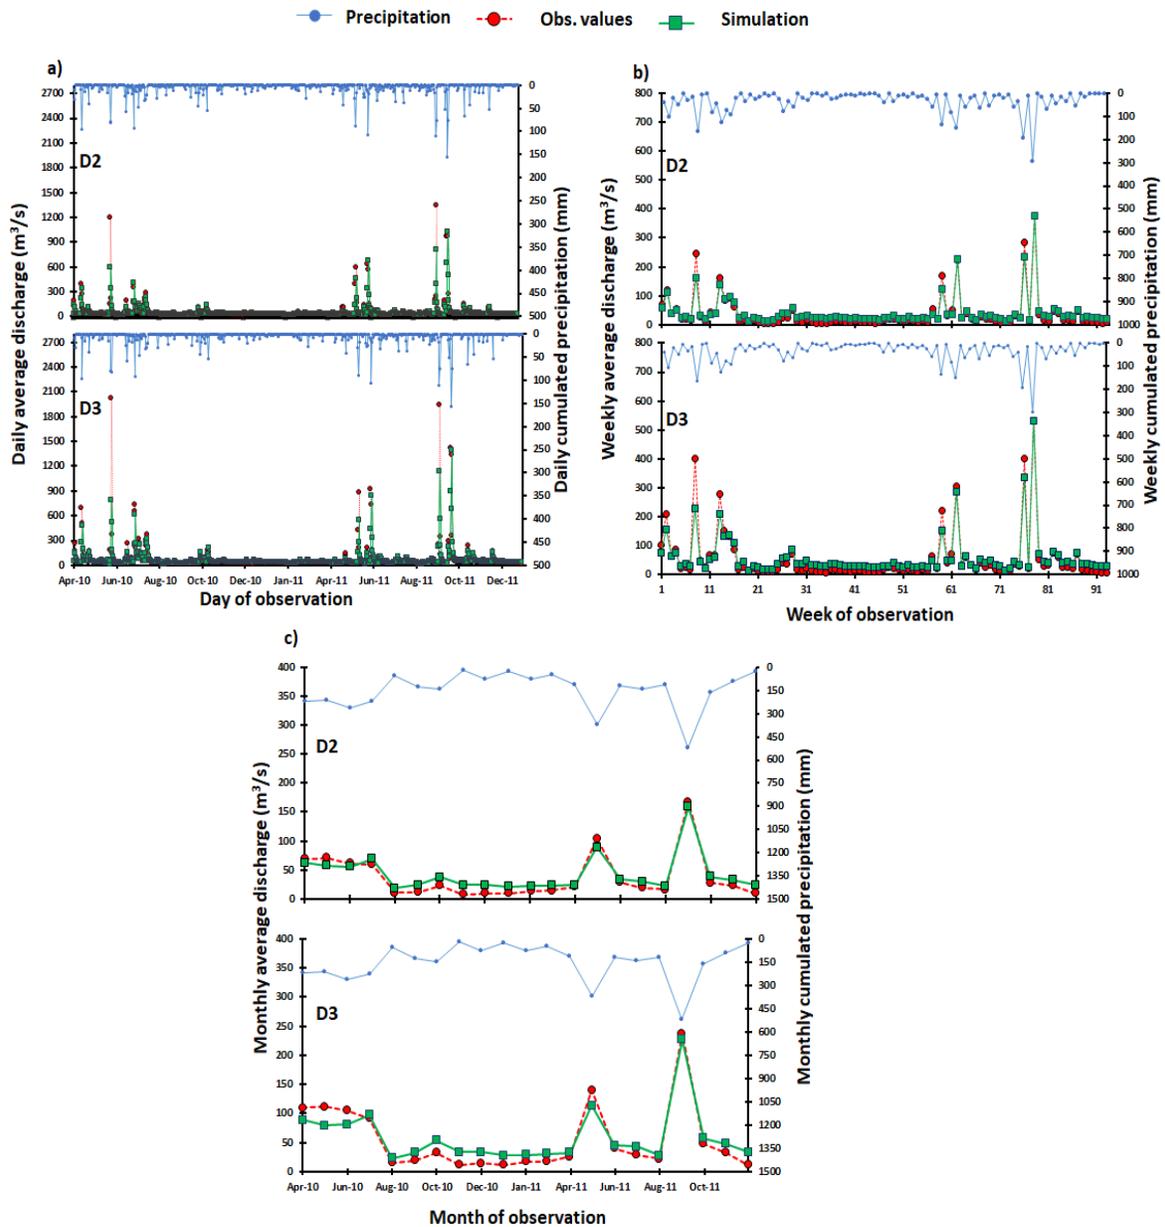

Fig. S1 - Hyeto-hydrograph of daily (a), weekly (b), and monthly (c) average observed and simulated mainstream discharge in stations D2 (central area of the watershed) and D3 (near the estuary) from April 2010 to December 2011. [29]

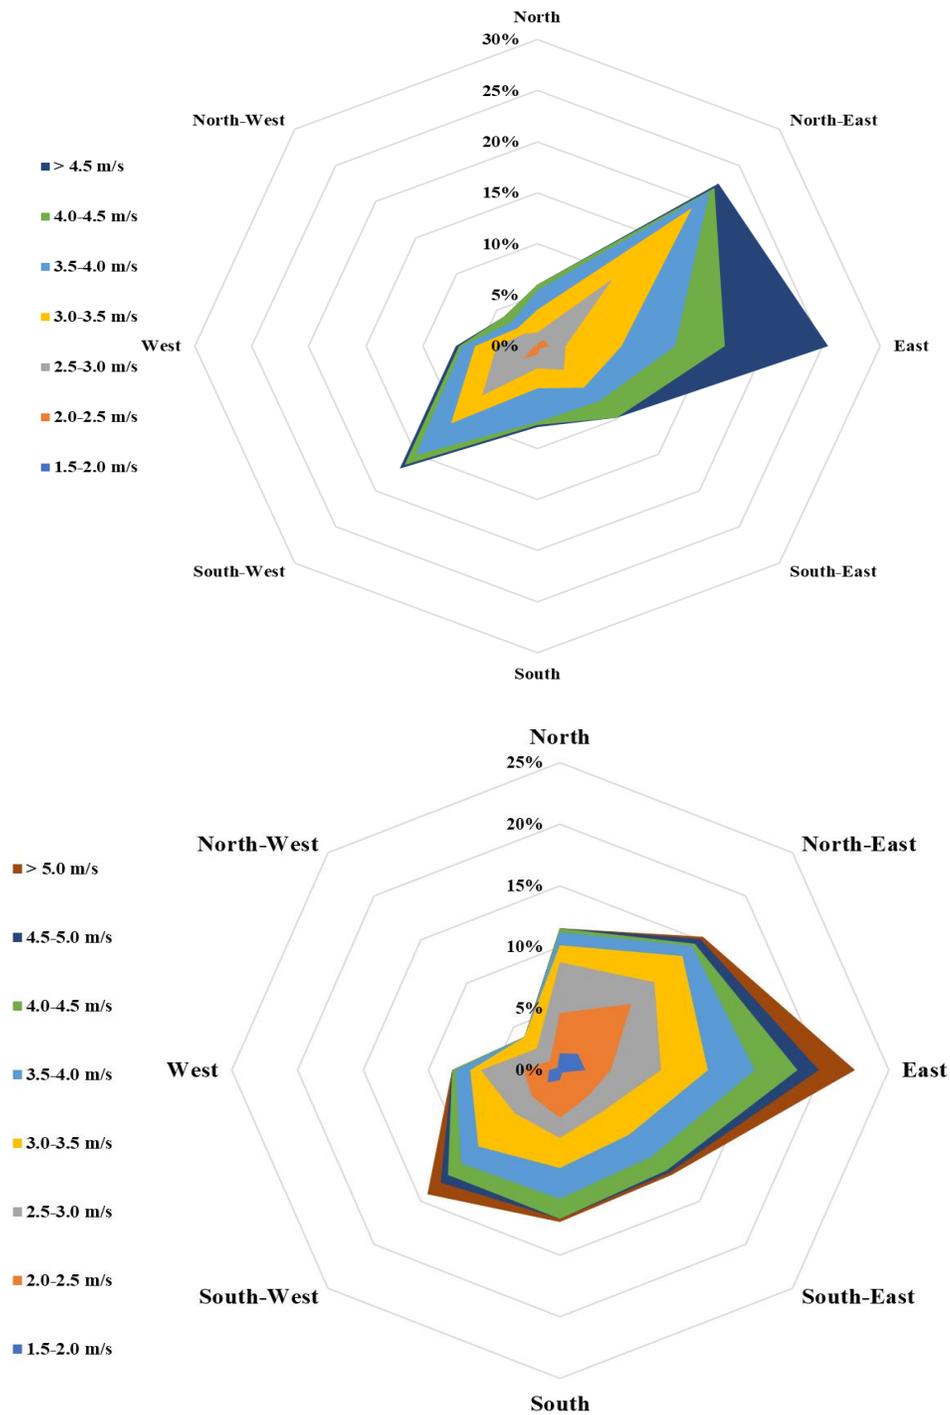

Fig. S2 – Observed and simulated rose wind chart for the period between March 2010 and February 2011 in the Harima Nada region

Table S1 – Mainstream discharge performance of the Kako River in stations D2 (central area of the watershed) and D3 (near the estuary) at different time resolutions [29]

April 2009 – Dec 2011	R ²	NSE	pBIAS	RSR
D2				
Daily	0.85	0.82	-14.8	0.42
Weekly	0.96	0.94	-15.4	0.25
Monthly	0.97	0.92	-14.7	0.21
D3				
Daily	0.81	0.77	-8.36	0.48
Weekly	0.94	0.91	-8.96	0.30
Monthly	0.94	0.91	-8.34	0.22

Table S2 – Monthly validation of WRF results in different AMeDAS stations of the Harima Nada region for temperature, u-wind, v-wind, wind speed, relative humidity, and atmospheric pressure
