

Supplemental Information

Literature values are divided into three categories based on analytical methods such as NAA, NI-NGMS and others such as IC, ID-MS, and ICP-MS. Literature values are summarized in Supplementary Material Tables S3, S4 and S5. When more than two data are reported, mean values are calculated in Supplementary Material Tables S3, S4 and S5, and these mean values are used for normalization in Figures 2, 3 and 4.

Literature

- Ebihara, M.; Saito, N.; Akaiwa, H.; Tomura, K. Instrumental and radiochemical neutron activation analysis of trace iodine in geological samples. *Anal. Sci.* **1992**, *8*, 183–187.
