Geochemical Modeling

Table S4. Aqueous and solid species equilibrium reactions and constants used for geochemical modeling of the As-O-H-S-Fe system with Spana. This is the input file. First column gives the chemical species, second column is the log(K) value and the final five columns give the stoichiometry in terms of the species H⁺, e⁻, HS⁻, As(OH)₃ and Fe²⁺. Equilibrium constants for As species modified according to Tables 1 and 2 in [2].
